The Railway Member of Government the Hon. Sir George Rainy presented the annual State Railway Budget on 25th February. It sharply reflected the current trade depression affecting India as well as the rest of the world and its main features are summarised in the following passage from the hon. member's speech. When I presented the budget estimates for the current year (1931-32) to the House we placed the total receipts at 101 crores and the total charges at nearly 95 crores, leaving surplus for the year of 5 crores. Of this latter sum 2 crores would in any case have been required to meet the loss on the strategic railways and a balance of about 1 crore would have been left towards the contribution (to general revenues). It was recognised, therefore, that the reserves would have to be drawn upon to the extent of 4 crores in order to pay the contribution. Actually our receipts are now estimated at 86½ crores and our total charges at 94 crores so that instead of a surplus there is a deficit of 7½ crores. This figure is raised to 9½ crores by the loss on the strategic railways and it becomes necessary to exhaust the balance of the Reserve Fund not in order to pay a contribution to the general revenues but to meet a part of the deficit. The amount in the Reserve Fund does not exceed 5 crores and in order to balance the accounts the only expedient open to us is a temporary loan of 4½ crores from the Depreciation Fund. In effect this means that after paying our obligatory interest charges the balance remaining falls short by this amount of the full allotment for depreciation. For the year 1932-33 we estimate that our total receipts will be 84½ crores and the total charges 94½ crores. The loss on commercial lines is therefore 5½ crores and to this must be added the loss on the strategic railways of 2 crores, the total deficit of the year being 7½ crores. As there is now no balance in the Reserve Fund, the whole of this sum has to be made good by a temporary loan from the Depreciation Fund. I ought to mention that this point that by a change in accounting methods both the earnings and the expenditure are higher by about 1½ crores than they would have been under the

system previously followed. This fact should be remembered when any comparison is made with the figures of the previous year.

The Finance Member the Hon. Sir George Schuster, presented his annual General Budget on 7th March. Like the Railway Budget, it deeply reflected the current trade depression. It showed that in the financial year just ending (1931-32) the monsoon was favourable and the year normal as regards agricultural production yet exports and imports fell to barely half what they were two years ago. The most striking falls in exports were in jute and jute products which fell from 69 crores to 28½ and in raw cotton which fell from just under 51 crores to 20½ while as regards imports the most notable cases were cotton manufactures which fell from 49.67 crores to 10.86 crores and sugar which fell from 13.8 to 4.9 crores. Despite this fall in the value of trade the favourable trade balance, including movements of treasure for the first 10 months of the year was 71 crores compared with 44 crores in 1929-30. Here is the significance of the export of the gold. As an indication of the prevalent higher rates of taxation the Finance Member showed that Government collected during the first 10 months of the year about 29 crores of import duties on 105 crores worth of imports as compared with 33 crores of duties on 201 crores of imports in 1929-30. These are salient facts of the situation. They tell their own story and provide the clue to the whole of the account of our finances.

The emergency 14-months Budget introduced by Government in September 1931 covered the financial year 1932-33. The Finance Member said in regard to it. According to our estimates in September we should on the then existing basis of taxation have had to face deficits of over 19 crores in each of the years 1931-32 and 1932-33. We hoped by our new measures of retrenchment and taxation to reduce the deficit for the current year (1931-32) to 10.17 crores and for next year when the effects of retrenchment would be fully felt and with the new rates of taxation applicable for a whole year to realise a surplus of 5.23 crores. The actual Customs returns for the months since September have made it necessary for us to revise our estimates. As a result we now allow for a deterioration in the figures by about 3 crores for each year and we anticipate that the current year will close with a deficit of 13.66 crores and that the surplus for 1932-33 will be 2.15 crores. This surplus of 2.15 crores based as it is on severely reduced estimates of revenue we regard as providing a reasonable margin of safety. The matter may be looked at in this way. If we combine the results for this year and next year our estimates show a net deficit of 11.51 crores. But as this is arrived at after providing 13.71 crores for Reduction of Debt, our current receipts for the two years will exceed our recurrent expenditure by 2.20 crores. If this result is achieved over two years of unexampled depression when practically every Government in the world is having to show very heavy deficits, we may, I think, justifiably regard the Indian financial position as comparatively sound.

GENERAL LEGISLATION

The President appointed Sir Hari Singh Gour, Mr. Arthur Moore, Sir Abdur Rahim and Sir Cowasji Jehangir on the Panel of Chairmen for the current session.

The legislative year was marked by the passage of several official measures of first importance. An Indian Air Force Bill, a measure nearly copied from the English Royal Air Force Bill, was passed through all its stages as a provision to regulate the establishment and control of the newly formed Indian Air Force. The Bengal Criminal Law Amendment (Supplementary) Bill to complement a Bill passed by the Bengal Provincial Legislature for dealing with revolutionary activities was after prolonged debate referred to Select Committee in Delhi eventually passed in the Simla autumn session. A Bill for the protection of the SUGAR INDUSTRY and another to extend for a year the protective import duty on Wheat were passed through all their stages. So was a Bill authorising the imposition of a higher import tariff on wireless reception apparatus in order to provide Government with funds with which to secure the continuance of broad casting in India. A Bill to establish an Indian Medical Council was introduced in the Delhi session early in the year. There was an Assembly discussion of the financial aspect of the question whether Burma should be separated from India, the House having before it a Memorandum prepared by Messrs Howard and Nixon of the Finance Department on the problem and a report by its own Standing Finance Committee, after consideration of the Memorandum. Government in the September session introduced a Bill to give the Bengal Government additional powers for the suppression of terrorism.

Ottawa Agreement

The normal autumn sittings of the Legislature, in Simla commenced on 5th September. The principal official business has already been mentioned in this chapter. There was a further special session of the Legislature in New Delhi in November, for the purpose of dealing with the Government's Agreement with the Imperial Government at Ottawa for a measure of mutual tariff Preference. The principle of the Agreement being an exchange of 10 per

cent tariff preferences between the United Kingdom and India. Government first referred the Agreement to the Assembly for a debate on a motion for its consideration by a Select Committee. This having been accepted, after prolonged debate and the Committee having reported in favour of the Agreement subject to certain special safeguarding provisions, particularly for the constant observation of the working of the Agreement to note its effects upon Indian trade. Government submitted a Bill to amend the Tariff Act in accordance with it. This measure was also debated at length and was referred to Select Committee. On the favourable report of the Committee it was passed by both Houses of the Legislature.

Non-Official Business.

A large number of non official Bills and Resolutions were brought before the Assembly. They mostly concerned social reform. Ral Bahadur Sarbajna moved for a Select Committee upon his Bill to give a Hindu widow a right to share in the inheritance of her husband's property. His motion was rejected by 55 votes to 25. Sir Hari Singh Gour moved for a Select Committee on his Bill to empower a Hindu wife to obtain divorce on the ground of her husband's impotence, incurable insanity or sallow leprosy. The first day of debate on the motion was unfinished when the House adjourned. The second day it was taken up there was a count-out. The same happened on the third day. Eventually the Bill was ordered for reconsideration. Orthodox Hindu and Muslim elected members joined in an effort to forward Bills to amend the Child Marriage Restraint Act (the Sarda Act) by so limiting its operation as to exclude the communities which they respectively represent. The first of these Bills was thrown out by 53 votes to 21 on the motion for its reference to Select Committee.

A non-official Resolution recommending the establishment of an Indian Supreme Court to interpret disputed points in the Constitution, to be a Court of Criminal and Civil appeal and generally to take the place of the Privy Council as a Court of Appeal for India was carried by 54 votes to 17, Government members abstaining.

The Indian Tariff Board, 1931-1932.

Iron and Steel.—The Government of India in 1930 received a representation that the manufacture in India of sundry iron and steel details required in railway and other engineering construction was hampered by the insufficiency of import duties on such articles. They referred the question to their Tariff Board and in January, 1931, published its report and their conclusions upon it.

The Board recommended that the import duties in question should be as follows:—

	Rs a
Fish bolts and nuts	} 2 4 per cwt
Ordinary and nuts	
Dog spikes	
Rivets	
Gibs cotters, keys	2 0 "

The Board stated. The materials for all these articles are manufactured by the Tata Iron & Steel Company. If the total demand for these articles were met by Indian manufacture a considerable improvement in the position of the Indian steel industry would be effected. We claim therefore that our proposals are not only justified on the ground of tariff equality but are in full accordance with the policy laid down by the Steel Industry (Protection) Act.

The Government of India accepted the report and negotiated through their Legislature a Bill to give effect to it and this received the Governor-General's assent on 28th January 1931.

Silver Plate.—Thread and Wire.—The Government of India in 1930 referred to the Tariff Board for investigation and report the question of extending protection to the manufacture in India of silver plate, silver thread and silver wire (including so-called gold thread and wire, mainly made from silver), silver leaf and other silver manufactures.

The Board's report on their inquiry was published in January, 1931. It contained the following:—

Our conclusion is that at present under a revenue duty of 38% *ad valorem* the Indian industry holds practically the whole market in Northern and Western India, but has not been able to capture the market in Southern India, where the finer class of woven silk goods are made. It is clear that the demand for goods into which gold thread has been woven or embroidered has largely increased. We attribute this expansion in demand mainly to the decline in the price of this class of goods. The bulk of the market is now held by the Indian manufacturers, but for the finer class of goods imported gold thread still competes. Intense competition also appears to exist between the interior kinds of Indian real gold thread and imported half-fine imitation. We consider, then, that a case had been made out for the protection of the gold thread industry and we recommend that the duty should be

fixed at 50% *ad valorem* applying alike to real gold thread lacemetta manufactures from silver wire such as spirals, spangles, etc and all colourable imitations. As regards the period of protection we are advised by the Department of Industries, Bombay, that it will take at least 10 years before the Indian industry can reach the European standard of quality and we recommend that the protective duty should be imposed for that period. We would urge that special efforts should be made by the Provincial Industries Departments to enable the Indian industry to capture the South Indian market. We desire to record our opinion that the institution of a training centre or technical institute at the chief centre of manufacture would lead to satisfactory results.

Government introduced legislation to impose the recommended duty and it was passed and received the Governor-General's assent on 28th February 1931.

Steel Rails.—The Government of India in 1930 referred to the Tariff Board for report the question whether an additional payment should not in future be made to the Tata Iron & Steel Co. Ltd. for steel rails purchased by the Government of India under their existing contract and what additional payment if any should be made in respect of 115lb. rails which were not covered by the term of the original contract.

The Board, in their report, which was published early in 1931, considered that the claim for an additional price was justified. They calculated that Rs 50 represented the increase per ton which might be made to the price of rails on account of diminution of orders and they recommended accordingly. As regards the question of additional price to be paid for 115 lb rails, the Board recommended that an additional Rs 7 per ton should be made, bringing the price to Rs. 137. They made their recommendation subject to the condition that this class of rails was included in the contract with the Railway Board and that all orders were placed with the Tata Iron & Steel Co. If orders were small or irregular a higher price, said the Board, would be necessary.

Legislation was passed accordingly.

Sugar.—The Government of India having in May, 1930, directed the Tariff Board to inquire whether protection was required and if so in what measure, for the sugar industry in India, the Board in a report published in 1931 reported that the existing depression of the industry throughout the world had been brought about by excess of production over consumption and by a large increase in the stocks held by producers in the principal sugar manufacturing countries, this excess having been accounted by the restriction of the available free trade market for sugar by tariffs. Prices in India, said the Board, follow generally the course of world prices and notwithstanding the steady

increase of revenue duty from 53 in 1916 to Rs 6 per cwt in March, 1930, the price of sugar in India had steadily been falling. The highest figure, reached in 1921, was Rs 40 and the lowest price touched, in 1929-31, was Rs. 7 15. The Indian area under cane had remained very steady, the average during the past twenty years being 2,340,000 acres.

The main product of sugar cane in India the Board showed to be gur of which between 2½ and 3 million tons are annually consumed. There were at present 29 factories capable of manufacturing white sugar direct from cane and also 14 factories capable of manufacturing white sugar mainly from gur. The total output of white sugar by factories and refiners amounted to about 100,000 tons annually. To this must be added about 200,000 tons manufactured annually by the common indigenous process known as the bel method.

It has not been established that up to the present the import of white sugar has seriously affected the price of gur or the acreage under cane. As a result of recent imports of Java gur and the manufacture of imitation gur from imported sugar it is found that the position of the gur industry may be threatened.

The imports of white sugar the Board found to be one million tons a year, an increase of 375,000 tons covered with pre-war imports. "We are satisfied that the three conditions laid down by the Fiscal Commission are fulfilled by the sugar industry and that a case for protection has been established."

The Board estimated the current fair selling price of white sugar manufactured in a typical factory in India to be Rs 9-5-9 a maund and said that at the end of the protective period this should have fallen to Rs. 7-12-5 a maund. They took the mean between these figures, namely Rs 8-9-1 a maund subject to adjustment as the basic fair selling price for Indian sugar during the period of protection. For second class sugar which constitutes about half that manufactured in India, they placed the fair selling price during the period of protection at Rs 8-12-1 a maund.

The Board considered that under present market conditions the price of imported Java sugar landed in Calcutta would be Rs 4 a maund though prices had touched as low as Rs 3-9-0 a maund landed in Calcutta, ex-duty, and it appeared not unlikely that Java might be prepared to land at Rs. 3-4-0.

Taking the fair selling price at Rs 8 15-1 and the normal landed price at Rs. 4, the measure of protection required throughout the protective period is Rs 4-13-1 per maund or Rs 6-9-3 per cwt. In order to enable the industry to face initial difficulties and to safeguard the position of the manufacturer of indigenous sugar by the bel method in Rohilkhand, we propose that for the first 7 years the duty should be fixed at Rs 7 4-0 per cwt and for the remaining period at Rs 6-4-0 a cwt. The total protection thus granted would be approximately the same as would result from the imposition of a duty of Rs. 4-9-8 for the whole period of protection. We recommend that the period of protection should be for 15 years.

The Board further recommended that should the current negotiations for international stabilisation of prices fail or should market prices in Calcutta fall below Rs. 4 ex-duty, a further duty of 8 annas a cwt. should immediately be imposed. It recommended that the protection should cover sugar-candy as well as sugar, but recommended no protection for gur.

The Board stressed the importance of sugar research and urged the expenditure of a further 10 lakhs a year upon this. They concluded:

Fair representation of Indian interests on the directorate and opportunity for Indian investors to subscribe to the share capital of new companies should be secured by such means as Government may consider practicable in the circumstances of the sugar industry.

The Government of India on 30th January 1932 announced that as economic conditions were very disturbed they considered 15 years too long for the initial protection period. They decided to impose a protective duty of Rs 7 4-0 a cwt. on all classes of sugar until 31st March 1935 and that provision be made in the statute for a further inquiry before the end of that period. They should not take power to impose the additional duty of 8 annas if the price fell below a certain level. The recommendation of an expenditure of 10 lakhs a year on research they promised to consider. The recommendation of the Board that the new sugar companies should be compelled to be registered as public companies involves the introduction of a new principle which the Government of India are unable to accept. In their opinion prohibition of the formation of private companies to develop the sugar industry would impose an undesirable handicap upon enterprise.

Legislation on the lines of the Government conclusions was duly passed.

Bamboo Paper.—Under the Bamboo Paper Industry (Protection) Act 1925 protective duties were imposed on certain kinds of paper in order to develop the manufacture in India of paper from bamboo. The duties under this Act being due to expire on 31st March 1932, the Government of India on 26th March 1931 referred to the Tariff Board the question whether the period of protection should be extended.

The Board's report, published early in 1932, recorded the opinion that the additional market for paper in India which Indian mills might expect to capture was about 20,000 tons a year excluding any normal increase in consumption. The prices of both paper and pulp, said the Board, had fallen since 1924-25 and although the paper mills had reduced works costs below the level anticipated in 1925 the surplus on realised prices over works costs had been less than the figure estimated by the Tariff Board as a reasonable margin. The difficulties of mechanical treatment of bamboo under mill conditions had been much greater than expected and had delayed development of bamboo as a paper making material. The withdrawal of the protective duty at the present time would inevitably lead to the disappearance of bamboo as a paper making material and "the withdrawal of the protective duty would seriously cripple their (Indian mills) resources and endanger their continued existence."

In order to further the development of bamboo the Board considered it necessary to offer a direct incentive to the manufacture of bamboo pulp by a duty on imported pulp. They held that a fair selling price for paper for Indian mills would be Rs 464 per ton. The price likely to be realised without duty they estimated to be Rs 341 per ton. On these figures the protective duty required is Rs 123 per ton. The duty on imported pulp should be fixed at Rs 45 per ton which is approximately the difference between the works cost of bamboo pulp and the current price of imported pulp, the duties to be in force for seven years.

Steps should be taken to develop the paper pulp section of the Forest Research Institute, Dehra Dun, with the object of co-ordinating the experimental work done by the mills.

The Government of India on 3rd March 1932 accepted the report as regards the need to continue protection and as regards the rates of duty on paper and pulp respectively, subject to certain revision of the basis of assessment on different classes of paper, in consultation with the different interests concerned in such a way as to obviate such disputes regarding the interpretation of the tariff as occurred over the former schedule.

Legislation was passed accordingly.

Wire and Wire Nails.—The Government of India on 7th May 1931 referred to the Tariff Board an application for the restoration of protection to the wire and wire nail industry. The Board's report was published early in 1932. It stated the duty free price of nails for the Indian Steel Wire Products Works to be Rs 7.4 per cwt. or Rs 145 per ton. The estimated fair selling price for nails being Rs 190, the measure of assistance required is Rs 45 per ton. The Board proposed a specific duty of Rs 45 per ton on wire as well as on wire nails. They excluded from their recommendation barbed or stranded wire fencing wire and wire netting and further recommended that the existing arrangement for exempting steel rod imported by the Indian Steel and Wire Products from duty should be continued. They also recommended that the protection of the wire and wire nail industry should fully be examined in connection with the next statutory steel inquiry.

The Board acknowledged complaints that the proposed duty would prejudice certain Indian industries dependent in the imports concerned, but held the feared ill effect was not likely to arise but should be dealt with by exemptions if it did.

The Government of India on 8rd February 1932 announced that they considered it of great importance to the successful establishment in India of the steel industry as a whole that new branches of the industry should be created and the market for steel made in India thereby widened. They accepted the Board's recommendation for a Rs 46 per ton duty mentioned in the Board's report and also the recommendation for the continued exemption from duty of the wire rod imported for Indian Steel Wire Products.

Legislation on these lines was passed.

Electric Wire and Cable.—The Government of India on 11th May 1931 referred to the Tariff Board an application for protection of the manufacture of electric wires and cables received from the Indian Cable Company Ltd. The Board's report, which was published on 6th February 1932 stated that the manufacture of electric wires and cables was not an industry which satisfied the conditions laid down by the Indian Fiscal Commission and the Board therefore made no recommendation for the grant of protection to it.

Government accepted the Board's view.

Fig Iron.—The report of the Tariff Board on an inquiry referred to the Government of India concerning the removal of the revenue duty on pig iron was published by Government in June 1931. The Board after reviewing the evidence presented to them said: "Our conclusion therefore is that no case has been made out upon which we can base any recommendation for the removal of the revenue duty. We think that no serious harm will be done to any consumer if it is retained until the statutory inquiry into the steel industry takes place in 1933-34 or earlier. The whole position can then be examined and if it is then found that a better case is made out for its removal the duty may be removed."

The Government of India on 18th June 1931 announced their acceptance of the finding of the Board.

Heavy Chemicals.—The Government of India on 16th July 1928 referred to the Tariff Board representations from certain Indian firms requesting protection for the manufacture of a group of heavy chemicals. The Board's report was published on 5th September 1931 and with it Government's conclusions upon it.

The Board in their report wrote: "The basis of the whole group of chemicals considered in the report is sulphuric acid. The heavy sea freight on acids has afforded a high natural protection to the manufacture of sulphuric, hydrochloric and nitric acids in India, with the result that it has proved profitable to manufacture these acids on a small scale at a high cost, but since the salts dependant upon the acids do not enjoy the same natural protection it has proved difficult for the Indian manufacturer of these salts to compete against imports from other countries in which the industry is highly developed."

The Board found the organisation of the industry in India unsatisfactory but said it fulfilled the conditions laid down by the Tariff Board. They therefore recommended a schedule of protective duties. The Board also recommended special railway freight concessions for the industry.

The Government of India, reviewing the report held that the imposition of duties by itself would not lead to the development of the industry on healthy lines but would tend to perpetuate the existing uneconomic organisation. They approved a modified scale of protective duties, these to have effect until 31st March 1933, pending further consideration of the possibilities of

reorganising the industry on an economic basis and expert investigation of the super phosphate bounty scheme recommended by the Board but not yet adopted. Government disapproved the recommendation for special railway freight. They added that they would be ready to discuss with representatives of the chemical industry how the question of developing it could best be furthered as in their view drastic reorganisation was indispensable if success was to be achieved.

Legislation followed and also consultation with the industry.

Glass.—The Government of India on 20th October 1931 referred to the Tariff Board an application from glass manufacturers for protection for their industry. The Board's report was not published by the end of 1932.

Cotton Textiles.—The Government of India on 6th April 1932 referred to the Tariff Board the question of further protection of the cotton textile industry. Since the Cotton Textile Industry (Protection) Act 1930 was passed three noteworthy changes in the situation of the industry had developed. The rates of duty on imported piecegoods had been raised for revenue purposes above the protection rates sanctioned by the Legislature, there had been an increase in imports of artificial silk goods and the Government of India had decided to discuss at the Imperial Economic Conference at Ottawa a proposal for a scheme of mutually beneficial tariff preferences between India and the United Kingdom.

The Board's report and Government's conclusions upon it were published on 30th August 1932. The Board recommended if possible specific protection against Japanese goods but added, "Failing acceptance of the suggestion the Board has recommended that the *ad valorem* duty on cotton piecegoods not of British manufacture, which was fixed by the

Cotton Textile Industry (Protection) Act 1930 at 20 per cent and to which surcharges amounting to 11½% have been added for revenue purposes by the Finance Act of 1931, should now be raised to 50%, and that the increased duty should remain in force till the 31st March 1933. In making this recommendation the Board has studied the view that the need for additional protection arises solely from the position created by the depreciation of the Japanese currency and that in view of the serious consequences with which the Indian industry is threatened by reason of the phenomenal increase of imports of cotton piecegoods from Japan the additional duty on those imports is imperative. If further, the Indo-Japanese Commercial Convention of 1904 is held to be a bar to any increase of duty on Japanese goods alone the Board recommends without hesitation that the proposed increase be applied to all cotton piecegoods not of British manufacture.

The Board found themselves technically unable to make recommendations to raise the minimum specific duty upon plain grey cotton piecegoods and only for that reason refrained from making any.

The Government of India accepted the Board's recommendations for an *ad valorem* increase of duty on cotton piecegoods not of British manufacture and by executive order gave effect to them. They decided similarly to increase the duty on plain grey piecegoods, the minimum specific duty upon them being increased to 54 annas per pound. The order imposing the new rates of duty came into force at once and was a temporary order valid until 31st March 1933 by which time the question could be brought before the Legislature.

Sericulture.—The Government of India on 3rd December 1932 referred to the Tariff Board the claims of the Indian sericultural industry for protection.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Barmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Hiley (Caste, Tribe and Race, Indian Census Report, 1901, the Gazetteer of India, Ethnology and Caste, Volume I, Chapter 5) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negroes may be disregarded.

The **Turko-Iranian**, represented by the Baluch, Brahui and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turkland Persian elements, in which the former predominate. Stature above mean, complexion fair, eyes mostly dark but occasionally grey, hair on face plentiful, head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The **Indo-Aryan** occupying the Punjab, Rajputana, and Kashmir, and having as its characteristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall, complexion fair, eyes dark, hair on face plentiful, head long, nose narrow, and prominent but not specially long.

The **Seythian-Dravidian**, comprising the Marathas, Bhamans, the Kunbis, and the Coorgs of Western India. Probably formed by a mixture of Seythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower-orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced.

The **Aryo-Dravidian** or **Hindustani**, found in the United Provinces, in parts of Raj

putana, and in Bihar and represented in its upper strata by the Hindustani Brahman and in its lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Aryan and Dravidian types. The head-form is long with a tendency to medium, the complexion varies from lightish brown to black, the nose ranges from medium to broad being always broader than among the Indo-Aryans, the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans, while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The **Mongoloid-Dravidian**, or **Bengali** type of Lower Bengal and Orissa, comprising the Bengal Brahmans and Kayasthas, the Mahomedans of Eastern Bengal, and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad, complexion dark, hair on face usually plentiful, stature medium, nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa, the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The **Mongoloid** type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu, the Lepchas of Darjeeling and Sikkim, the Limbus, Murmis and Gurungs of Nepal, the Bodos of Assam, and the Burmese. The head is broad, complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, face characteristically flat, eyelids often oblique.

The **Dravidian** type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Pariahs of Malabar and the Savals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Seythian, and Mongoloid elements. In typical specimens the stature is short or below mean, the complexion very dark, approaching black, hair plentiful, with an occasional tendency to curl, eyes dark, head long, nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in

India, the medley of forest clad ranges, terraced plateaus, and undulating plains, which, roughly speaking, from the Vindhya to Cape Comorin. On the east and the west of the peninsular area the domain of the Dravidian is continuous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognisable at a glance by his black skin, his squat figure, and the negro-like proportion of

his nose. In the upper strata of the vast social deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.

TOWN AND COUNTRY

The progress of urbanisation in India—there has been any progress at all—has been very slow during the past thirty years, the whole increase being less than one per cent. An examination of the statistics shows that whilst towns with populations above 50,000, increased by over 16 per cent in the decade, the increase was considerably less in those

between 5,000 and 50,000, whereas the population of towns between 10 to 20 thousand did not keep abreast of the progress of the general population of the country. The statistics reveal the gradual decadence of the medium-size country town and the growth of the larger cities under the influence of commercial and industrial development.

DISTRIBUTION OF POPULATION IN GROUPS OF TOWNS ACCORDING TO SIZE AND IN RURAL TERRITORY

Class of places	1921		1921
	Places.	Population	Per cent.
Total Population	687,935	816,017,751	100.0
Urban Territory	2,513	32,418,770	10.8
Towns having—

II 50,000 to 100,000	54	3,517,749	1.1
III 20,000 to 50,000	199	5,925,675	1.8
IV 10,000 to 20,000	450	6,206,583	2.6
V 5,000 to 10,000	885	6,223,011	2.0
VI Under 5,000	690	2,331,054	7.7
Rural Territory	685,422	288,598,975	89.8

Migration.—Of the population of the Indian Empire only 603,526 were enumerated as born in other parts of the world. Of these about four-fifths came from other Asiatic countries, such as Nepal, Afghanistan, China, Siam, Ceylon, and Arabia and the remainder mostly from Great Britain and other countries of Europe. The emigration from India is approximately 1.7 million, so the numbers who move between India and other countries is about two millions. Of the total immigrant population of 707,000 in Burma 573,000 are Indians, 108,000 Chinese, representing 80 and 15 per cent respectively of the whole number. Of the Provinces which contribute most largely to the streams of migrants the most conspicuous are Bihar and Orissa, about 1½ million, the United Provinces about 1 million, Madras ¾ of a million, Rajputana ¾ of a million and Hyderabad ¼ of a million. The number of persons resident in

India who were born outside the Indian Empire is 603,526 and of these 274,000 were born in Nepal, 116,000 in the British Isles, 108,000 in China and 48,000 in Afghanistan.

The statistics of emigration outside India are far from complete.

The number of Indians belonging to regiments and labour-corps outside India at the time of the census was about 125,000. Of these the majority were probably in Mesopotamia and Palestine. According to the returns the number of Indians in the colonies, irrespective of birth-place, amounts to 1,622,000 of whom 1,023,000 or about two-thirds are males. More than four-fifths are Hindus and about half of the remainder are Muslims. The colonies which attract an appreciable number of emigrants are shown below. About one-ninth of the emigrants failed to specify their province of birth, and of the remainder no

over 841,000 or 80 per cent were from Madras, 24,000 from Bombay, 18,000 from the Punjab, 17,000 from the North-West Frontier Province and 11,000 from Bengal. The majority of the emigrants work as agricultural labourers on rubber, tea, coffee and other plantations. Under the Defence of India Rules indentured labour emigration was stopped in March 1917, but there had been a considerable outflow of labourers to the colonies in the previous years and more than 2½ millions of natives of India passed through the ports of Madras and Calcutta as indentured labourers for the various colonies during the decade. Of the labourers 83,000 went from Calcutta, but the bulk were from the Madras Presidency and their

destination was Ceylon and the Straits Settlements. There is very little emigration from the ports of Bombay and Karachi. Altogether about two million labourers returned to India from the colonies during the decade.

RELIGIONS

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded. Speaking broadly of every hundred persons in the Indian Empire 68 are Hindus, 23 Mahomedans, 3 Buddhists, 3 follow the religion of their tribes one is a Chris-

tian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain much less probably a Parsi and just as possibly either a Jew, a Brahmo or a holder of indefinite beliefs. The enumerated totals of the Indian religions are set out in the following table—

Religion	Actual number in 1921 (000's omitted)	Proportion per 10,000 of population in 1921	Variation per cent (Increase + Decrease—) 1911 1921
Indo Aryan	232,723	7,362	+ 1
Hindu	216,736	6,856	— 6
Brahmanic	216,261	6,841	— 6
Arya	498	15	+92.1
Brahmo	6	2	+ 7.4
Sikh	3,239	103	— 5.6
Jain	1,178	37	+ 7.9
Buddhist	1,571	366	+ 1.7
Iranian (Zoroastrian (Parsi))	102	3	+ 4.2
Semitic	73,511	2,325	+ 5.1
Musulman	68,735	2,174	+32.6
Christian	4,754	150	+ 3.8
Jew	22	6	— 5.1
Primitive (Tribal)	9,775	309	—61.5
Miscellaneous (Minor Religions and religions not returned)	18	1	

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 89 per cent of the population. Hindus are in the majority in Assam, Bihar and Orissa, the United Provinces, the Central India tracts, Rajputana and Bombay. Muhammadans monopolize the North West Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Punjab and Eastern Bengal and Sind. They form about 23 per cent of the population of Assam, 14 per cent in the United Provinces and 10 per cent in Hyderabad. The Buddhists are almost entirely confined to Burma where they are 85 per cent of the population. The Sikhs are localized in the Punjab and the Jains in Rajputana, Ajmer Marwar and the neighbouring States. Those who were classed as following Tribal Religions are chiefly found in Bihar and Orissa, the Central Provinces and Assam, but Bengal, Burma, Madras, Rajputana, Central India and Hyderabad also returned a considerable number

under this head. More than three fifths of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Punjab the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam. The Parsis and Jews are chief residents of the Bombay Presidency.

Christians.—The Christian community now numbers just 4½ millions of persons in India or 1½ per cent of the population. Fifty-nine per cent of Christians are returned from the Madras Presidency and its State, and the community can claim 82 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent in Cochin and 29 per cent in Travancore, where the increase during the decade was about 30 per cent. Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab and Bihar and Orissa each having over

800 thousands, Bombay, Burma and the United Provinces between 200 and 300 thousands and Bengal and Assam between 100 and 150 thousands. Divided racially Europeans (and allied races) number 176 thousands, Anglo-Indians 113 thousands and Indians nearly 4½ millions so that out of every 100 Christians 98 are Indians, 4 are Europeans and 3 are Anglo-Indians.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census of India was taken on the night of February 24th in Burma and on that of 26th in India. The total population of India as thus ascertained is 351,450,839 viz British Territory 270,612,162 and Indian States 80,838,677 giving an increase of 23,608,869 in British Territory and 8,899,340 in Indian States. These figures are provisional, but the experience of previous Censuses shows that the difference between the population according to the provisional totals and that as finally ascertained does not amount to more than about 1 in 2,600 persons and the figures are therefore sufficiently accurate for practical purposes and can be adopted by Local Governments for administrative purposes and for calculation of proportions and percentages based on population.

The proportional variations at each of the last two Censuses are given below—

	1901 to 1911	1911 to 1921	1921 to 1931
	1911	1921	1931
India	+ 7.1	+ 1.2	- 10.2
Provinces	+ 5.5	+ 1.8	- 9.55
States	+ 12.9	- 1.0	+ 12.3

These ratios differ slightly from those in the statements appended, as allowance has been made in the former for the inclusion of new areas. The areas now dealt with for the first time have an estimated population of 13,327 persons.

AGE AND SEX.

The figures of the total population of India are not tabulated by annual age-periods but the table below gives the age distribution of 10,000 males and females in the Indian population

Age-group	1921		1911	
	Male	Female	Male	Female
0-5	1,302	1,516	1,327	1,433
5-10	1,471	1,494	1,393	1,332
10-15	1,245	1,081	1,165	907
15-20	842	815	848	826
20-25	775	821	822	900
25-30	865	825	896	909
30-35	825	838	829	885
35-40	636	665	622	556
40-45	621	621	634	631
45-50	392	346	380	353
50-55	434	438	432	443
55-60	185	198	177	164
60-65	266	298	237	305
65-70	81	79	82	75
70 & over	160	180	145	176
Mean age	24.8	24.7	24.7	24.7

In the whole of British India the infant death-rate amounts to about one-fifth of the total death-rate for all ages and about one-fifth of the children die before the age of one year. The ratios of deaths vary in different provinces the birth-rate being an important factor. Thus they are specially high in the United Provinces and Central Provinces where the birth rate is high and low in Madras which has a lower general birth-rate. The recorded rates in some of the cities are phenomenally high but may, owing to the defective reporting of births, be somewhat exaggerated.

Special causes contribute to the high mortality of infants in India. Owing to the custom of early marriage co-habitation and child birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. Available statistics show that over 40 per cent of the deaths of infants occur in the first week after birth and over 60 per cent in the first month. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from diarrhoea or dysentery.

Infant mortality in Cities

Sex Ratio.—In the whole of India there is an excess of males over females, the figures being 945 females per thousand males. These results being opposed to experience in most other countries of the world have been challenged and attributed to errors in the Indian census. This reasoning is rejected by the Census authorities, who insist that the disparity between the sexes is due to special conditions in the Indian Empire. The sex ratio has fallen in the last twenty years throughout India. The statistics of birth suggest that the proportion of females born to males born has, if anything, declined during this period, and in any case there has been a marked decline in the last five years of the last decade in most provinces. The decline in the proportion of women however is chiefly due to (a) the absence of famine mortality which selects adversely to males and (b) the heavy mortality from plague and influenza which has selected adversely to females.

Marriage.—The subject of polygamy has been discussed fully in the report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The table shows the number of married women per 1,000 married men in India and the main provinces. No definite conclusions however can be drawn from these figures because (1) they probably contain a certain number of widows divorcees and prostitutes who have wrongly returned as married and (2) it is impossible accurately to gauge the effect of migration on the figures of the married in any area. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practiced among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low but otherwise the custom is of sociological rather than of statistical interest.

Number of married females per 1,000 males

India	1,008
Assam	976
Bengal	966
Bihar and Orissa	1,034
Bombay	987
Burma	924
C.P. and Berar	1,024
Madras	1,001
Punjab	1,021
United Provinces	1,013

Widows.—The proportion of widows in the populations, viz., 6.4 per cent., does not differ widely from the figure for European countries, but the number of widows is strikingly

age. The large number of Indian widows is in part due to the early age of marriage, partly to the disparity in the ages of the husbands and wives but chiefly to the prejudice against the remarriage of widows. The higher castes of Hindus forbid it altogether and, as the custom

is held to be a mark of social respectability many of the more ambitious of the lower castes have adopted it by way of raising their social status, while Muhammadans who are closely brought into touch with their Hindu neighbours are apt to share the prejudice.

Proportion of widows in the population per 1,000

Age	India, 1921	England and Wales, 1911	Age	India, 1921	England and Wales, 1911
All ages	175.0	73.2	20—25	71.6	1.5
0—5	7		25—35	146.9	13.1
5—10	4.5		35—45	225.2	50.5
10—15	16.8		45—55	619.4	198.3
15—20	41.4		55 and over	824.0	565.9

Early Marriage.—The figures clearly show an increase in the numbers of those in the early age-categories who are still unmarried. The movement is most marked in the Hindu community but is shared by the other religions,

the change being less noticeable among the Buddhist and Christian communities who are not addicted to early marriage. The change is most conspicuous in the age-categories 10 to 15 for women and 10 to 20 for men.

SOCIAL AND ECONOMIC CONDITIONS.

Literacy.—The number of persons in India literate in the sense of being able to write a letter and read the reply is 22.6 millions, amounting, if children under five years of age are excluded, to 82 in every thousand of the population. Of males 139 in every thousand at age five and above are literate, the corresponding proportion in the case of females being 61.

The Hindus have one literate person in every thirteen, for males the ratio is one in eight and for females one in sixty-three. The proportion of Sikh males who are literate is less than that of Hindus. One Mahomedan male in 11 and one female in 116 can read and write. The low position of Mussalmans is partly due to the fact that in Bengal, the Punjab, North-West Frontier Province and Sind, where they predominate, they are mostly agricultural. Where they are in a minority, as in the Central Provinces, United Provinces and Madras, they are usually town-dwellers and have a considerably higher proportion of literates. The Hindu community embraces every stratum of society and the proportion of literacy is seriously affected by the inclusion of the vast mass of the lower rural classes. Some of the higher Hindu castes have more literate males than the Parsis whilst others are on a level with or even below the aboriginal tribes.

English.—In the whole of India 2.5 million persons or 190 males and 18 females in every ten thousand persons of each sex aged five and over can read and write English.

One in thirty males in Bengal and one in forty-three in Bombay are literate in English.

In Madras, Assam and Burma the proportion is 8 per cent, while in Bihar and Orissa, the Central Provinces and the United Provinces it is below 1 per cent. Of the States Cochin and Travancore have between 3 and 4 per cent, but in others the proportions are much lower. More than half the number of Parsi males and one-fourth of their females can read and write English. Of Christians nearly all the Europeans and many of the Anglo-Indian are literate in English, but except on the southern coast English literacy is rare among the Indian Christians and the regional proportions therefore largely follow the racial distribution. Though the proportions in the other communities, taken on the total populations, are small, some of the higher castes have a fairly large number of English-knowing members. In Bengal about half of the Baidys males and a quarter of the Brahman and Kayastha males are literate in English while in Madras more than a quarter of the Tamil Brahmans can claim this accomplishment. Of the Jain in Kathiawar nearly a tenth are literate in English though the Chaturth Jains of Kolhapur, who are cultivators, are less literate than the average of the Presidency. During the decade the number of males knowing English rose by 61 per cent and that of females by 57 per cent. Among the main Provinces the greatest progress has been made by Bengal, Assam and Bombay and in the States by Cochin, Travancore, Mysore and Baroda.

Languages.—In the whole Indian Empire 222 languages were returned at the census, dialects, as has been previously explained, not having been separately considered.

The principal languages are given in the following statement —

Language	Number of speakers in (000's omitted)		Percentage of increase or decrease
	1921	1911	
Western Hindi	96 714	96,041	+ 7
Bengali	49,294	48,368	+ 2
Telugu	25,601	23 543	+ 2
Marathi	18 798	19 807	- 5
Tamil	18,760	18,128	+ 4
Punjabi	16,234	15,977	+ 2
Rajasthani	12,681	14,068	-10
Kannarese	10,374	10,526	- 1
Oriya	10 143	10 162	- 2
Gujarati	9,552	9,238	+ 3
Burmese	8,423	7,394	+ 7
Malayalam	7 498	6,752	+10
Lahnda or Western Panjabi	5,652	4,779	+18

The necessity of a common medium of conversation and intercourse, which has given rise to bilingualism and the consequent displacement of tribal languages, has formed the subject of a considerable amount of discussion and suggestion during the last decade and a good deal has been written on the possibility of a *lingua franca* for India. The combined speakers of Eastern and Western Hindi considerably exceed in number the strength of any other individual language in India and if we add to these two languages Bihari and Rajasthani, which so resemble Hindi as to be frequently returned under that name in the census schedules, we get well over 100 millions of speakers of tongues which have some considerable affinities and cover a very large area of northern and central India. In their pure forms these four languages may be scientifically distinct, but this is not the popular view. There is a common element in the main languages of northern and central India which renders their speakers, with out any great conscious change in their speech mutually intelligible to one another, and this common basis already forms an approach to a *lingua franca* over a large part of India.

Infirmities.—These are classes under four main heads—insanity, deaf mutism, blindness and leprosy. The appended statement shows the number of persons suffering from each infirmity at each of the last five censuses and the proportion per hundred thousand of the population —

Infirmity	NUMBER AFFLICTED WITH RATIO PER HUNDRED THOUSAND OF THE POPULATION				
	1921	1911	1901	1891	1881
Insane	88,705 28	81,000 28	66,805 23	74,379 27	81 139 35
Deaf mutes	186,644 60	192,891 64	162,168 52	196,861 75	197,215 86
Blind	479,837 152	448,658 142	354,104 121	458 868 167	526,748 229
Lepers	102,513 32	109,094 35	97,340 33	126,244 46	131,968 57
TOTAL	860,099 272	833,644 267	670 817 229	856,282 315	937,068 407

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed, partly, to a progressive improvement in the accuracy of the diagnosis and, partly, to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a

considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901 many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891 there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons falling from 315 to 267. The small increase in the present decade amounting to 25,455 persons or one per 100,000 may be due to improvement in record and tabulation but is certainly unexpected.

OCCUPATIONS

India is essentially an agricultural country and agriculture proper supports 224 millions of persons or 71 per cent of the population of the Empire. If we add the pastoral and hunting occupations the percentage rises to 73, while a considerable proportion of the unfortunate large number of persons in the category of vague and unclassifiable occupations are probably labourers closely connected with the occupations of the land. Industries support 10 per cent of the population, but the bulk of these are engaged in unorganised industries connected with the supply of personal and household necessities and the simple implements of work. Organised industries occupy only 1 per cent of the people in trade and transport on which less than 6 per cent and 2 per cent, respectively, depend; a not inconsiderable number are connected with the disposal of the various kinds of agricultural products. The administration and protection of the country engage only 4,820,170 persons or 1½ per cent of the population, and the remainder are supported by domestic miscellaneous and unproductive occupations. Though the extent to which agriculture predominates in individual provinces varies, there is no region in which it does not in some form easily take the first place. In spite of the trade of Calcutta and the numerous industrial and mining concerns of Bengal and Bihar and Orissa the population of the eastern provinces is overwhelmingly agricultural and contains a higher percentage of persons supported by the land than any other tract of India. Of industrial workers the largest

proportions in the local population are in the Punjab the United Provinces and Bombay. Of these three provinces however agriculture dominates the economic life of the first two, where the industrial occupations, though they engage a substantial number of persons, are mostly of the cottage industry type. In Bombay the development of organized industry is of some economic importance but is at present largely confined to a few of the biggest cities. In the category of unclassified occupations the majority of persons are labourers whose particular form of labour is unspecified and the rest mostly unspecified clerks.

Compared with 1911 the agriculturists have increased a little faster than the total population, though fishermen and hunters are fewer. Miners have risen in number with the recent expansion of the industry. Industries have substantially decreased and of the principal forms of industry the textile workers have dropped considerably as also have potters and workers in wood and metal. An increase under transport by rail is countered by a drop under transport by road. Trade has increased, trade in textiles showing a slight rise and trade in food a slight drop. The number employed in public administration is practically stationary but the army has risen while the police has fallen heavily. Law and medicine have gained at the expense of religion, and though instruction has spread letters have fallen. Rentiers are fewer and domestic servants as many. Beggars and vagrants the raw material of crime and disease, have decreased but criminals the finished article, have risen in numbers.

Indians Overseas.

NUMBERS.—The total Indian population resident in the countries to which Indians mainly emigrate for purposes of settlement according to the latest available returns, is as follows:—

Name of country		Indian population.	Date of Information

* Including Straits Settlements, Federated and Unfederated Malay States.

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purposes of labour dates from the beginning of the 19th century. From 1800 A. D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tobacco, and coconut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1840, when a French merchant, named Joseph Argand, carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (59 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1843) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Réunion and Bourbon, which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Réunion, Martinique, Guadeloupe, and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated

and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1873 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1857, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872 subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1878 brought to light a number of points requiring amendment.

Recent Legislation.—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pithers and Mr. Grieson) to ascertain, in the N. W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specifies the countries to which emigration is lawful, but empowers the Governor-General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Antigua, Barbados, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out

Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Réunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1906 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs McNeill and Chimanlal, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Present Position.—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three—

(a) Control of emigration

(b) Rights of Indians to admission to other parts of the Empire.

(c) Rights and disabilities of Indians domiciled overseas

These questions may be considered separately

Control of Emigration—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows—

'10 (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor General in Council, by notification in the *Gazette of India*, may specify in this behalf

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber either without modification or addition, or with modifications and additions to which both Chambers agree, but, upon such approval being given, the notification may be issued in the form in which it has been so approved"

Under this law emigration has been legalised to Ceylon on the following conditions

(1) The emigrant shall—

(a) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of Ceylon, or

(b) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him

(2) The emigrant shall not, before leaving British India, have entered into a contract of service for a period exceeding one month

(3) Within six months from the issue of this Notification, or within such further period as the Governor General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void.

(4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fund to be raised in such manner and managed by such agency as may appear suitable to the Colonial Government.

(5) The Government of Ceylon shall at any time when so desired by the Governor-General in Council admit and give all facilities to an Agent appointed under section 7 of the Act.

(6) Within one year of his arrival in Ceylon any emigrant who has been assisted to emigrate at the cost of the common fund referred to in clause (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which he is required to do is un-

suitable to his capacity, or that he has been unjustly treated by his employer, or for any other sufficient reason, be repatriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters' Association

(7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Ceylon shall appoint a person to perform the duties of the Agent as set forth in clause (6)

(8) Within six months from the issue of this Notification or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by a recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable

(9) The Government of Ceylon shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of persons emigrating to Ceylon in accordance with this Notification

Similar conditions have been imposed in the case of Malaya. Emigration was also permitted to Mauritius for a period of 1 year only with effect from May 1st 1923, and limited to a number not exceeding 1,500 labourers. The terms were more onerous than in the case of nearer Colonies and the arrangement has now lapsed

Emigration to British Guiana for the purpose of unskilled work has also been declared lawful on the terms and conditions given below, but the date from which emigration is to commence has not yet been fixed—

Emigration to British Guiana—Emigration to British Guiana for the purpose of unskilled work shall be lawful with effect from such date as the Governor General in Council may with the concurrence of the Governor of British Guiana notify in the *Gazette of India* on the following terms and conditions, which shall thereupon become operative—

(1) The family shall be the unit for the purpose of emigration. Not more than 500 families shall be permitted to emigrate and the number of persons included in the said 500 families shall not exceed 1,500

(2) The emigrants shall either have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of British Guiana, or have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him

(3) No part of the cost of his recruitment or subsistence during transport shall be recoverable from any emigrant and all expenses in this connection shall be borne by the Government of British Guiana or met from funds at their disposal.

(4) The Government of British Guiana shall at any time when so desired by the Governor-General in Council, admit and give all facilities to an Agent appointed under section 7 of the Act.

(5) If at any time there is no Agent appointed under section 7 of the Act, or if the Agent is absent or unable to perform his duties, the Government of British Guiana shall at the request of the Governor-General in Council appoint a person to perform temporarily the duties of the Agent.

(6) Prior to the arrival of the emigrants a Settlement Commission shall be appointed in British Guiana to select and prepare suitable agricultural land for the emigrants and generally to supervise their employment. The Agent referred to in clause (4) shall, on appointment, be a member of such Commission.

(7) The Government of British Guiana shall offer to each family for its separate enjoyment a holding comprising not less than five acres of suitable agricultural land prepared for cultivation on the terms hereinafter set out in a locality which shall be healthy and shall have an adequate supply of good drinking water. All expenses in connection with the preparation of the holdings shall be borne by the Government of British Guiana and shall in no case be recoverable from an emigrant.

The annual rent of the holding shall be fixed by the Settlement Commission at a rate not exceeding the lowest rate paid in the locality.

After an emigrant has been in occupation of a holding for three years, he shall, provided that he has cultivated a portion of the holding either by himself or through some member of his family, be entitled to a grant of the holding on payment at any time during the ensuing four years of such fees not exceeding 24 dollars as may be fixed by the Settlement Commission.

On the expiry of seven years from the date of the commencement of his occupation of a holding an emigrant shall acquire absolute ownership in the holding provided that he has paid the rent and fees referred to in the foregoing paragraphs of this clause and has brought under cultivation either by himself or by some member of his family half the area of his holding.

(8) An emigrant on arrival in British Guiana shall be housed and maintained without charge by the Government of British Guiana for at least one month.

(9) If any emigrant so requires loans shall be made to him for maintenance, house accommodation, payment of rent and for agricultural purposes generally. Free medical assistance and free skilled supervision shall be provided.

(10) Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of 7 years from the date of his arrival in British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 3 and not more than 5 years from the date of his arrival

in British Guiana on payment to the Government of British Guiana of half of the cost of his passage from his residence in India to British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 3 and not more than 7 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of quarter of the cost of his passage from his residence in India to British Guiana.

(11) Notwithstanding anything contained in the last preceding clause the Government of British Guiana on the request of an Agent appointed under section 7 of the Act shall repatriate at its own expense and without any payment by or on behalf of the emigrant to the place of his former residence in India any emigrant at any time after his arrival in British Guiana.

(12) An emigrant shall be at liberty at any time after his arrival in British Guiana to take up work or employment other than or in addition to the cultivation of a holding on lease from the Settlement Commission.

(13) The ordinance enjoining compulsory education in British Guiana shall be enforced to the same extent in the case of Indian children as in the case of children belonging to other communities.

(14) Boards of arbitration in regard to wages shall be established before the arrival of the emigrants and Indians shall be adequately represented on such boards.

(15) Any Indian who has emigrated to British Guiana before the date of this notification and under any agreement in force at the date of this notification is entitled to an assisted return passage to India shall not be required to pay more than 25 per cent. of the excess in the cost of his return passage and clothing at the time of his first arrival in the colony.

(16) Any Indian who has emigrated to British Guiana before the date of this notification and has at the date of this notification become or thereafter becomes destitute shall be entitled to be repatriated to India at the expense of the Government of British Guiana without being further required to prove that he has become incapable of labour.

(17) The Government of British Guiana shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of the persons emigrating to the Colony in accordance with this notification.

Admission of Indians to Other Parts of the Empire.—On the motion of the Government of India this question was discussed at the Imperial War Conference, 1917 and 1918, and the policy accepted by the self-governing dominions and the British Government was embodied in the following resolutions—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the

composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education, such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (a) That not more than one wife and her children shall be admitted for each such Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuitable to the requirements of the Union. Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unless he possesses in his own right \$50 dollars. New Zealand and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passport. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile. With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter, the British

Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognizes that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found at once as may be to reach a more satisfactory position."

The Right Hon'ble Srinivasa Sastry visited the Dominions of Australia, Canada, and New Zealand in the course of 1922 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of his mission was to appeal to the Governments and public of Canada and Australia fully to enfranchise qualified domiciled Indians. At the time of Mr Sastry's visit Indians resident in Queensland and Western Australia had neither the provincial nor the federal franchise. In Canada, Indians resident in British Columbia were and are still excluded from the dominion as well as the provincial franchise. While successful in securing a more sympathetic atmosphere towards Indians, Mr Sastry failed to bring about any modification in the existing electoral laws.

The question of giving effect to the resolution of 1921 was raised by the Indian representatives at the Imperial Conference, 1923. Their proposal was as follows—

Let the Dominion Governments who have an Indian population, let His Majesty's Government in the areas under their direct control, such as Kenya, Uganda, Fiji and other places where there are Indians resident, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how soonest the principle of equality implicit in the 1921 Resolution may be implemented."

This proposal was favourably received by the Dominion Premiers, including General Smuts, and by the Secretary of State for the

Colonies who cordially agreed that there should be full consultation and discussion between him and a Committee appointed by the Government of India upon all questions affecting British Indians domiciled in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr J Hope Simpson, M.P., Chairman, Sir H the Aga Khan, Sir B Robertson, Siran Bahadur T. Rangachari, M.L.A., and Mr K O Roy with Mr. B E Ewbank, C.I.E. I.O.S., as Secretary to make representations to the Colonial Office on certain outstanding questions affecting Indians in Kenya and Fiji. The Committee assembled in London early in April 1924 and dispersed towards the end of July. During this period they had several interviews with the Secretary of State for the Colonies and the officials of the Colonial Office, in which they made representations upon a variety of important matters affecting Indians in Kenya in Fiji and in the mandated territory of Tanganyika. In regard to Kenya, the representations covered all questions of interest to India dealt with in the decision of His Majesty's Government. The result of these representations was announced by Mr J H Thomas in the House of Commons on August 7th, 1924. The situation in Kenya also improved as a result of the work of the committee by the decision of the Indian community to relinquish their former attitude of non-co-operation and to accept an arrangement by which they will select five members to be nominated by the Governor to the Legislative Council. The result of the representations which the Committee made on certain outstanding questions relating to Indians in Fiji was announced on January 12th, 1927, when the Government of India published the more important papers relating to the negotiations which had been going on with the Colonial Office for some time.

Summary of present Position—Outside Australia, N Zealand and Canada the position stands as follows —

(1) **South Africa**—The main grievances of Indians, which led to a passive resistance movement headed by Mr Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Baines-Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters —

(i) Mr Gorges, Secretary for the Interior, to Mr Gandhi June 30th, 1914. With regard to the administration of existing laws, the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights.

(ii) Mr Gandhi to Mr Gorges, July 7th, 1914

"By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading, no matter how often he shifts his residence or business from place to place in the same township."

This has been officially interpreted to mean that the vested rights of these Indians who were then living and trading in townships, whether in contravention of the law or not should be respected.

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows —

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No 35 of 1905) and Act No 37 of 1919 should not be repealed.

(2) There should be no compulsory repatriation of Asiatics but

(3) Voluntary repatriation should be encouraged.

(4) There should be no compulsory segregation of Asiatics but

(5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions —

(a) to lay out residential areas for Asiatics,

(b) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted.

(6) These areas should be selected and allocated by a board of independent persons in consultation with the Municipal Council and Asiatic community.

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes, outside townships, should be confined to the coast belt, say, 20 to 30 miles inland.

(8) A uniform "License Law" applicable to all the Provinces of the Union should be possible to be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive consolidating Act of Parliament providing, *inter alia* —

(a) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction, outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator.

(b) The grounds upon which an application for the grant of a new license may be refused

(c) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application.

(d) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator.

(c) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop store or other place of business

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws

(10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner give a ready ear to any complaints or grievances and generally safeguard their interests

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but it was not accepted by the Union Government.

Present Position—Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal. In the remaining two provinces they are not enfranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal. Their immigration into the Union is barred and severe restrictions exist on inter-provincial migration. In the Transvaal they are not allowed to acquire immovable property outside locations and on the Witwatersrand they are subject to the restrictions of the Gold Law.

The anti Asiatic party have made several efforts, especially in Natal, further to curtail the rights of Indians. Some of these are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms. Examples of recent anti Asiatic legislation of major importance are

(a) The Natal Rural Dealers Licensing Ordinance, transferring the power of granting trading licenses from the Licensing Officer to an elected Licensing Board, on which Indians may not sit.

(b) The Durban Land Alienation Ordinance. This Ordinance, which enables Municipalities in selling land to assign it for particular communities, and to that extent to secure segregation, has been allowed on condition that Asiatics are given reasonable opportunity for acquiring adequate residential sites

Anti Asiatic feeling in South Africa—A bill for the segregation of Asiatics known as the Class Areas Bill was introduced in the Union Assembly in March 1924 which though not specifically directed against Indians, contained provisions which could be used for the compulsory segregation of all Asiatics in certain areas. Indian opinion was deeply agitated over the prospect of this legislation which it was apprehended might in the existing state of public opinion in South Africa result in the economic ruin of a large number of Indian traders in the Union. In response to the vigorous protests made by the Government of India the Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements of resident Indians. The Government of India whilst welcoming the assurance were unable to rest satisfied with this position and made every effort to persuade the Union Government to abandon the project. For the moment they have succeeded as in consequence of the unexpected dissolution of the South African Parliament the bill has lapsed.

In Natal an Ordinance was introduced in the Provincial Council in 1921 dealing with the township franchise to the detriment of the Indian community. It was again introduced in 1922 and in a modified form in 1923 but in each instance the Union Government withheld its approval. In 1923 the Union Government itself introduced a measure entitled The Class Areas Bill, containing provisions which could be used in urban areas for the compulsory segregation of Asiatics. Indian opinion was deeply exercised over the prospects of this legislation, despite the assurance of the Union Government that it desired to apply the measure in a spirit of fairness to the interests and reasonable requirements of Indian residents. But in consequence of the unexpected dissolution of the South African House of Assembly in April, 1924, the Bill lapsed. Towards the end of December 1924, news was received that the Government of South Africa had given its consent to the Natal Borough Ordinance. This measure while safeguarding the rights of Indians already on the electoral roll of Boroughs, prevents further enrolment of Indians as burgesses. Similarly the Natal Township Franchise Ordinance (No. 3 of 1925) was passed to or to render Indians ineligible for Township Franchise in future. Further, towards the end of January 1925 news was received that the Union Government had gazetted a Bill to amend the Mines and Works Act in order to take powers to refuse certificates of competency to natives or Asiatics in certain occupations. The Government of India made suitable representations in the matter to the Union Government and the Select Committee to which the measure was referred altered its wording so as not to refer to Asiatics and natives directly. The Bill as amended by the Select

Committee was passed by the Union Assembly but rejected by the Senate. In January 1926 it was reintroduced and in May it was adopted in a joint Session of the Senate and the Assembly by eighty-three votes to sixty-seven. In reply to representations made by the Government of India they were informed that there was no present intention on the part of the Union Government of extending regulations beyond the position as it existed prior to the judgment of the Transvaal Provincial Division of the Supreme Court in the case *Rex versus Hildick Smith* when it was held that certain regulations with reference to mines and works which have actually been in force in the Union of South Africa since 1911 and in certain provinces for many years before that date were not valid under sections of the Act in terms of which they were promulgated. The Government of India were assured that should any such extension of the scope of these regulations be contemplated in future every reasonable opportunity will be given to all the parties in the Union interested in the matter to make representations.

In July 1925 a more comprehensive Bill, known as the Areas Reservation and Immigration and Registration (Further Provision) Bill, was introduced in the Union Assembly. The Government of India made effective representations against the provisions of this Bill both on grounds of principle as well as of detail.

Deputation to S. Africa

Towards the end of November 1925, the Government of India, with the concurrence of the Government of South Africa, sent a deputation to South Africa, the personnel of which was as follows:—

G. F. Paddison, Esq., C.B.L. I.C.S., Commissioner of Labour, Madras—*Leader*

Hon'ble Syed Raza Ali, M.C.S.—*Member*

Sir Deva Prasad Sarvadikary, Kt., C.I.E.—*Member*

G. S. Bajpai, Esq., C.B.L., I.C.S.—*Secretary*

The main purpose of the deputation was to collect as soon as possible first-hand information regarding the economic condition and general position of the resident Indian community in South Africa and to form an appreciation of the wishes and requirements of the Indian community in South Africa. This deputation was followed by a return visit to India of a Parliamentary deputation from the Union Government of which the following were members:—

The Hon'ble F. W. Beyers, Minister of Mines and Industries, Pretoria, Durban, K.O., C.M.G., Messrs. A. C. Fordom, J. S. Marwick, G. Bayburn, O. S. Vermooten, W. H. Mood, and J. E. Hartshorn. As a result of the investigations of these deputations, the Government of India and of the Union arranged for a meeting in the Union of a further delegation from India to explore every possible avenue, in order to arrive at a satisfactory solution of the Indian problem.

The Indian delegation whose members were Sir Muhammad Habibullah, the Hon'ble Sir Fathma Sothna, Sir Darryl Lindsay, Sir G. S. Paddison, the Kt. Hon'ble Srinivas Sastry, Mr. G. L. Corrie and Mr. G. S. Bajpai, assembled in Conference with the Parliamentary deputation in Cape Town on the 17th December 1926. At the Session which lasted until the 11th January 1927, the contentious differences were discussed by the delegates freely and openly and in a spirit of determination to find a satisfactory solution of the outstanding difficulties. At the close of the Conference the delegates were therefore able to recommend the following articles, which were unhesitatingly approved of by the respective Governments as a basis of agreement:—

- (1) Both Governments reaffirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of Western Standard of life
- (2) The Union Government recognise that Indians domiciled in the Union, who are prepared to conform to Western Standards of life, should be enabled to do so.
- (3) For those Indians in the Union who may desire to avail themselves of it, the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after three years continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted Emigration Scheme, who desire to return to the Union within the three years, will be allowed to do so only on refund to the Union Government of the cost of the assistance received by them.
- (4) The Government of India recognise their obligation to look after such emigrants on their arrival in India.
- (5) The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918.
- (6) In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement which has now happily been reached between the two Governments and in order that the agreement may come into operation under the most favourable auspices and have a fair trial, the Government of the Union of South Africa have decided not to proceed further with Areas Reservation, Immigration and Registration (Further Provision) Bill.
- (7) The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest.

- (8) The Government of the Union of South Africa have requested the Government of India to appoint an Agent in the Union in order to secure continuous and effective co-operation between the two Governments

In India, the settlement was on the whole well received. In South Africa the more responsible newspapers, both English and Dutch, e.g., the Cape Times and Die Burger, paid handsome tributes to both delegations for the statesmanship which they had brought to bear on their work, and the eminently reasonable and practical character of the results achieved by them. The majority of people in both countries doubtless regard it as a good first step in the solution of a complicated problem and the spirit, of which it is the outcome, as the best guarantee of a progressive and friendly adjustment honourable to both parties.

The friendly relations which were happily established between the Government of India and the Union Government of South Africa as a result of the agreement not only continue but have grown in warmth and sincerity. The Government of India sent out as their first Agent in South Africa the Right Hon. B. Srinivas Sastri P.C. who was a member of the Government of India's Delegation to the Cape Town Conference. His appointment was received with universal approval both in India and South Africa, the satisfaction felt by the Union Government being indicated by their decision, as an act of grace to make his appointment, to extend an amnesty to all Indians illegally present in the Union. On their part the Union Government after the ratification of the Agreement by the two Governments, lost no time in introducing legislation to give effect to their undertakings under it, so that when Mr. Sastri arrived in South Africa in June 1927 all that remained to be done was to take action under Part III of the Agreement relating to the measures required for the upliftment of the Indian community. Most of the provisions of this part concern the Province of Natal where the bulk of the Indian population of the Union is resident, and the Union Government were not slow in moving the Provincial Administration to appoint a Commission to enquire into the condition of Indian education in that province and to devise the means necessary for its improvement. Co-operation with this Commission on the part of the Government of India was provided by the Deputation from India of two educational experts—Mr. K. P. Kishu I.E.S. Deputy Director of Education in the United Provinces and Miss C. Gordon B.E. (Edin.) Madras Educational Service, Lecturer in Kindergarten methods at the Government Training College at Saidapet, to advise and assist the Commission in its investigations and deliberations.

A notable feature of the present situation was the marked spirit of friendliness and good will which now animates the Union Government in dealing with all problems affecting the demoralised Indian community. An example of this occurred in the year 1927 when a measure was introduced in the Union Parliament known as the Liquor Bill, clause 104 of which purported

to prohibit the employment of Indians on any licensed premises—hotels, clubs, breweries, etc. The appearance of this clause which threatened the livelihood of 3,000 Indians engaged in such occupations, caused consternation among them and the Minister in charge decided to withdraw the clause from the scope of the Bill.

Much of the credit for the salutary measures referred to and the spirit of friendliness which they denote were due to the Right Hon. Mr. Sastri, the Agent of the Government of India in South Africa whose tact and honesty earned for him the confidence of the European community, official and non-official alike and an increasing measure of their sympathy and assistance in furtherance of the Indian cause. Gratifying response was made by the Indians to this appeal for £20,000 for the purpose of opening a combined Teachers' Training and High school in Durban. The institution which meets an urgent need for Indians in the Union of South Africa was opened on October 14th 1922, by His Excellency the Earl of Athlone Governor General of South Africa. It is known as the Sastri College and has on its staff six fully qualified Indian teachers recruited in India.

In India the Government of India have appointed officers to look after repatriates and their personal property immediately upon their return from South Africa to arrange for their despatch to their homes and, if possible, to find them employment for which they may be suited.

Early in 1929, the Rt. Hon. V. B. Srinivas Sastri retired on the expiration of his period of appointment and Sir Kurma Venkata Reddi, K.C., was chosen as his successor. In December 1929, sudden and serious illness compelled Sir Kurma Reddi to return to India on sick leave. During the time he has held his post, Sir Kurma has amply justified his selection to this important office.

Early in February 1930 the Government of the Union of South Africa set up a Select Committee of the House of the Assembly to enquire into certain questions relating to the right of Indians to occupy and own fixed property in the Transvaal and to propose such legislation to the House as it might deem fit. This decision was the result of a number of recent judicial judgments bearing upon the occupation of premises on proclaimed grounds in the Transvaal by persons belonging to the native races of Asia and to the wide-spread belief that the intentions of the Union Parliament as indicated in Act 87 of 1919 which purported to prohibit the acquisition of immovable property by Asiatics subsequent to its coming into operation were being systematically defeated. As the labours of the Committee were likely to affect important Indian interests and as Sir Kurma Reddi was on leave in India, the Government of India deputed Mr. J. D. Tyson, L.O.B., to make suitable representations to the Committee for safeguarding legitimate Indian interests and to give the Indian community in the Transvaal such assistance as it might need for placing its views before the Committee. The Committee's conclusions which were embodied in a Bill and its Report were placed on the table of the Legislative Assembly of the Union on the 18th May and the Bill prepared by them was

read in the House for the first time on the 14th of that month. As soon as copies of the Bill and the Select Committee's Report reached the Government of India, they made pending representations to the Government of the Union to allow adequate time for careful examination of the far reaching provisions of the measure which the Select Committee had prepared. Their representations were not without effect and the Union Government decided to postpone further consideration of the Bill until the next session of the Union Parliament early in 1931.

The bill did not, however, come up before the Union Parliament in 1931, as the Union Government agreed to postpone it further until after the conference between their representatives and the representatives of the Government of India in connection with the revision of the Cape Town Agreement of 1927. This Conference was held at Cape Town in January-February 1932. The Government of India delegation was led by the Honourable Sir Fazl-i-Husain, the other members being the Rt. Honourable V. B. Srinivasa Sastri, Sir Geoffrey Corbett, Sir Percy Lindsay, Mrs. Sarojini Naidu, Mr. G. S. Bajpai and Sir K. V. Reddi.

The results of the Conference were announced simultaneously in India and South Africa on the 5th April, 1932. As regards the Cape Town Agreement of 1927 the following statement was made —

1. In accordance with paragraph 7 of the Cape Town Agreement of 1927 delegates of the Government of the Union of South Africa and of the Government of India met at Cape Town from January 12th to February 4th, 1932 to consider the working of the Agreement and to exchange views as to any modifications that experience might suggest. The delegates had a full and frank discussion in the Conference which was throughout marked by a spirit of cordiality and mutual good-will.

2. Both Governments consider that the Cape Town Agreement has been a powerful influence in fostering friendly relations between them and that they should continue to co-operate in the common object of harmonising their respective interests in regard to Indians resident in the Union.

3. It was recognised that the possibilities of the Union's scheme of assisted emigration to India are now practically exhausted owing to the economic and climatic conditions of India, as well as to the fact that 80 per cent of the Indian population of the Union are now South Africans born. As a consequence the possibilities of land-settlement outside India, as already contemplated in paragraph 3 of the Agreement, have been further considered. The Government of India will co-operate with the Government of the Union in exploring the possibilities of a colonisation scheme for settling Indians, both from India and from South Africa in other countries. In this investigation, which should take place during the course of the present year a representative of the Indian community in South Africa will, if they so desire, be associated. As soon as the investigation has been completed the two Governments will consider the results of the enquiry.

4. No other modification of the Agreement is for the present considered necessary.

The Union Government have taken action to implement the first part of paragraph 3 of the statement. No suggestions in regard to the exploration of the possibilities of a colonisation scheme for settling Indians both from India and South Africa in other countries have so far been received. The South African Indian Congress has decided to appoint a delegate to the proposed committee of investigation on certain conditions.

As regards the Transvaal Asiatic Land Tenure Act, certain changes were made which broadly speaking had the effect of further safeguarding Indian rights than was expected at the time when the results of the Conference were announced in India in April. These modifications were explained to the Members of the Indian Legislative Assembly in the following statement which was made on the 12th September, 1932 —

Clause 5 of the original Bill which sought to segregate Asiatics by provision for the year marking of areas for the occupation or ownership of land exclusively by Asiatics has been deleted. Instead, the Gold Law has been amended to empower the Minister of the Interior after consultation with the Minister of Mines to withdraw any land from the operation of sections 130 and 131 of the Gold Law in so far as they prohibit residence upon or occupation of any land by coloured persons. This power will be exercised after inquiry into individual cases by an impartial commission presided over by a judge to validate present illegal occupations and to permit exceptions to be made in future from occupational restrictions of the Gold Law.

Fixed property acquired by Asiatic companies up to 1st May 1930 in which the controlling interest was nominally in the hands of Europeans but *de facto* in the hands of Asiatics of which stood lawfully registered in favour of an individual Asiatic on the same date and fixed property held through European trustees immediately prior to the 15th May 1930 will all be protected. Shares held by an Asiatic or Asiatic Company in a private company, which in the terms of the original Bill, would have been forfeited to the State if the company acquired any fixed property after the 1st May 1930 are protected provided that they were held by an Asiatic on the 1st May 1932 and have not been transferred by him since that date and they will be heritable by one Asiatic from another who lawfully holds them.

The provision in the original Bill which declared illegal the occupation of any fresh land after 1st May 1919 in the same township by an Asiatic has been made applicable from the 1st May 1930. Extensions made between the 1st May 1919 and 1st May 1930 are protected.

In areas, like Springs which, according to a judicial pronouncement were not formerly subject to the restrictive provisions of the Gold Law but which have now been brought under those restrictions, Indians who were lawfully residing on or occupying land on the 1st May 1930, will have their right of residence or occupation protected and will also be able to transfer the right to their lawful successors in title.

Local bodies, whom the original bill required to refuse certificates of fitness to an Asiatic to trade on the ground that the applicant may not lawfully carry on business on the premises for which the licence is sought, shall have to treat a certificate issued by a competent Government officer to the effect that any land has been withdrawn from the restrictive provisions of sections 190 and 181 of the Gold Law as sufficient proof that a coloured person may lawfully trade on such land. If an application for a certificate which is necessary for the grant of a licence is refused on the ground of insufficiency of title to occupy the land on which the business is to be carried on, an appeal may be preferred to the Magistrate of the district. The decision of the Magistrate on any such appeal is further subject to an appeal to the Transvaal Provincial Division of the Supreme Court.

The South African Indian Congress has condemned the Act and a Committee to organise Passive Resistance has already been appointed. But no action has been taken by this Committee pending the report of the Commission, which has been appointed by the Union Government under the chairmanship of the Honourable Mr Justice Fetham to enquire into the occupation by coloured persons of proclaimed land in the Transvaal.

Kunwar Sir Maharaaj Singh, Kt. C.I.E., M.A. Bar-at-Law, who has succeeded Sir K. V. Reddi kt., as Agent of the Government of India in South Africa is closely watching the proceedings of the Commission and is assisting the Indian community in the Transvaal to place their case before it.

(2) **Kenya Colony**.—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India, dated October 21st 1920. The controversy centred round the following points:—

(a) **FRANCHISE**.—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis plus an educational test, without racial discrimination for all British subjects.

(b) **SEGREGATION**.—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly that it was impracticable and secondly that it was commercially inconvenient and thirdly, that Indians are in practice unfairly treated in the allocation of sites.

(c) **THE HIGHLANDS**.—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now however been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(d) **IMMIGRATION**.—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that 'the interests of the African native must be paramount,' and in light of this it was decided —

(a) **FRANCHISE**.—A communal franchise was adopted with 11 seats for elected Europeans, 6 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian is also appointed on the Governor's Executive Council.

(b) **SEGREGATION**.—The policy of segregation as between Europeans and Asiatics is abandoned.

(c) **THE HIGHLANDS**.—The existing practice is maintained both as regards initial grants and transfers. A smaller reservation in the lowlands is offered to Indians.

(d) **IMMIGRATION**.—Racial discrimination in immigration regulations is rejected. But in the economic interests of the Africans, further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda have been instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded "their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them "and reserved liberty to reopen the case on a suitable opportunity." They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictive therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonial Committee —

(1) **IMMIGRATION**—My position is that if danger ever arises of such an influx of immigrants, of whatever class, race, nationality or character, as may likely be prejudicial to the economic interest of the natives, I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) **FRANCHISE**—I have given careful consideration to representations in favour of a common poll, but I am not prepared to raise the question already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) **HIGHLANDS**—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, expressed or implied which had been given in the past and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) **LOWLANDS**—It was proposed to reserve an area in the lowlands for agricultural immigrant grants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question.

With regard to the announcement in connection with "Lowlands" the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-cooperation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924 His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be

heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which under his chairmanship had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1925, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll tax. The Indian community resented this differentiation and, ultimately the Colonial Government decided that both communities should pay the same form of tax, viz. an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January 1927.

In view of the issue of another White Paper in July 1927 in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters the question regarding the position of Indians in Kenya again came to the forefront.

The announcement excited serious apprehensions in India with regard to the future position of Indians in these Colonies. A deputation drawn mainly from both houses of the Indian Legislature also waited on His Excellency the Viceroy on the 17th September 1927 and represented the position of Indians in East Africa. One of the suggestions made by the deputation was that permission may be given for a small deputation appointed by the Government of India to go over to East Africa in order—

- (a) to make a general survey of these territories in relation to Indian interests therein and
- (b) to help the resident Indian community in preparing their evidence for the Commission.

The Government of India readily accepted this suggestion and with the approval of His Majesty's Government, sent Kuntwar Maharaj Singh, C.I.E. and Mr. B. B. Ewbank, C.I.E. I.C.S., to East Africa. These officers visited Kenya, Uganda, Zanzibar and Tanganyika and

their services are understood to have been greatly appreciated by the resident Indian communities. The personnel of the Commission was announced by the Secretary of State for the Colonies on November 14th, 1927 and was as follows:—The Right Hon'ble Sir Edward Hilton-Young, P.C. G.B.E., D.S.O. D.S.O., M.P. (Chairman), Sir Reginald Mant, K.O.L.E., C.I.E., Sir George Schuster, K.O.M.G. C.B.E., M.C., and Mr. G. H. Oldham, Member with Mr. H. P. Downie (Secretary). The Commission left England on December 22nd, 1927 and travelled via the Nile to Uganda, and thence to Kenya, Tanganyika, Zanzibar, Nyasaland, and Northern Rhodesia, visiting the chief centres and hearing the views of representatives of different sections of the community. The Commission also visited Salisbury for the purpose of conferring with the Government of Southern Rhodesia. The report of the Commission was published on the 18th January 1929.

It was examined by the Government of India in consultation with the Standing Emigration Committee of the Indian Legislature and with prominent representatives of all parties in the Legislative Assembly who were not members of the Committee. The tentative conclusions reached by Government on the main recommendations in the Report were set out in a telegram to the Secretary of State for India of the 19th March 1929 which was published in India in September 1929.

In March 1929 the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under Secretary of State for the Colonies, to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected, with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivas Sastry, P.C., to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal if he wished to make use of him in dealing with the Indian deputations.

Mr. Sastry left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

- press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike,
- invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll

- oppose the grant of responsible government to Kenya or of any institutions leading up to it,
- oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson
- demand, in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians,
- advocate the continuance of the official majority in the Legislative Council of Kenya,
- demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions

In September 1929 the Indian Delegation from E. Africa was received by Sir Fasil Husain, Member in charge of the Education, Health and Land Department of the Government of India at Simla. The Delegation was represented by Mr. J. B. Pandya, Mr. C. P. Dada and Mr. Jawahar from E. Africa and Mr. H. K. Munshi and Sir Feroz Khan Noon from India. Sir Frank Noyce, Secretary and Mr. A. B. Reid, Joint Secretary in the E. H. L. Department, were also present.

Sir Fasil Husain welcomed the delegation and requested them to tell him in what manner they wished the Government of India to help them. The delegation stated the views of the Indian Communities in E. Africa on the matters arising out of the Hilton Young Commission's Report which in their judgment most vitally affected Indian interests. The statement made by the delegation related principally to the question of common franchise in Kenya, the representation of the natives of the country on the Council of the Federation of the several territories in E. Africa along the lines suggested in the report, the reservation of land in Kenya for the settlement of Indians, the residential segregation of Indians in Kenya, the appointment of an Indian Trade Commissioner in East Africa, the improvement of educational facilities for Indians in East Africa, the appointment of Indians in the higher public services there and the better political representation of Indian interests in Uganda and Tanganyika. The delegation also requested the Government of India to nominate a representative to accompany the Deputation which they propose to send to London shortly to put the Indian case before His Majesty's Government before they pass any orders on the Hilton Young Commission's Report.

Sir Fasil Husain thanked the delegation for their interesting statement, but said that, before he could make any statement on the attitude of the Government of India in regard to the points advanced by the delegation or reply to their request for the nomination by the Government of India of a representative to accompany the proposed deputation to London, he would like the members of the delegation to attend the meeting which the Government of India had arranged to hold upon the 14th September, with leading members of the Legislature and the

Standing Emigration Committee, so that the latter might have the advantage of hearing the delegation themselves before they advised the Government of India upon the situation. The delegation expressed their readiness to attend the meeting and then withdrew.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 6th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June, 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November 1930. The Government of India communicated their views in a despatch to the Secretary of State for India, on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V S Srinivasa Sastry P C O K as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr Sastry in July, 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931 and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August, 1932.

As regards the question of *Closer Union*, His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory, the time has not arrived for taking any far reaching step in the direction of the formal Union of the several East African Dependencies.

As regards the Common Electoral roll the Committee have stated that it would be impracticable under present conditions to advocate the adoption of the system in preference to the existing system of election. This recommendation has also been accepted by His Majesty's Government. It has also been decided that no change should be made in the present arrangement which secures an official majority in the Kenya Legislative Council.

During the year 1937 another matter which engaged Government and the public in India was the report of the local Government Commission which was appointed by the Governor of Kenya in July 1936, to make recommendations as to the establishment or extension of local Government for certain areas in the Colony.—The report of the Commission

was submitted to the Governor of Kenya in February 1937. The recommendations made were numerous and so far as Indians were concerned they involved a decrease in the proportion of Indian representation on the local bodies at Nairobi and Mombasa and the creation of an European elected majority in both places. This caused resentment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's Secretary of State for India on the subject.

In 1928 the Local Government (Municipalities) Ordinance was passed. This amended the law relating to Municipal Govt in Kenya to provide for the nomination of 7 unofficial Indian Members as against 9 European Members to be elected in Nairobi and for the nomination to the Municipal Board of Mombasa of an equal number of European and Indian Members *vide*, 7.

(3) *Fiji and British Guiana*—Emigration to Fiji was stopped in 1917 under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure, if possible a renewal of emigration to the Colony an unofficial mission composed of the Bishop of Polynesia and Mr Rankine, Receiver General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonization, which was referred to a committee of the Imperial Legislative Council on 4th February 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January 1920 and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji. In July, 1920 the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members Messrs Srinivasa Sastry and Hridaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkataswami Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant B. Hissam-ud-din Khan, did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large numbers left Fiji. Many arrived in India comparatively destitute while others who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921 from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony as well as of such near relations as they desired to take with them. Admireable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April 1922, and submitted its report to the Government of India. It has not been published.

In February 1920, Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made therein for the election of three Indian members on a communal basis. On the 4th November 1920 one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote all three Indian members resigned their seats and, no Indian having subsequently offered himself for election, the seats remained unfilled throughout the life of the Council. A fresh election was held during 1922 and as a result two Indian constituencies have returned their representatives to the Council but no candidate offered himself for election from the third constituency. It is understood that the two recently elected members have also withdrawn from the Council owing to the decision of the Secretary of State for the Colonies that the introduction of a common electoral roll in Fiji is impracticable at present.

British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon. Mr. Dr. J. J. Numan, Attorney General, and Mr. T. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonization of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay, Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice-President, and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Numan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation they would before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matters. Kunwar Maharaaj Singh, M.A. G.I.F., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September 1922. His report was received on February 1st 1924 and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonization scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March 1923 following special inquiries by the Colonial Office reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution) Order in Council 1923, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

(4) **Other Parts of the Empire.**—In Ceylon, Mauritius, and Malaya, the position of Indians has on the whole been satisfactory, and the matters have gone smoothly. The Government of India have now appointed

their own Agents in Ceylon and Malaya. The question of the fixation of a standard minimum wage for Indian Estate labourers in Ceylon and Malaya has been the subject of negotiations between the Govt. of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922. So far as Ceylon is concerned a settlement satisfactory to the Govt. of India and that of Ceylon has been arrived at, i.e., the standard wage and other outstanding questions affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as "Indian Labour Ordinance No 27 of 1927". The Standard Rates of Wages agreed upon were introduced with effect from the 1st January 1929. In 1931 however it was decided with the concurrence of the Government of India to reduce these wages by 5 cents for men, 4 cents for women and 3 cents for children by way of readjustment owing to the price of rice issued from estates being fixed at Rs 4 80 instead of Rs 6 40 per bushel. In regard to Malaya Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas and the question of their extension to the rest of Malaya is engaging attention. The rates so fixed were, however reduced by 20 per cent with effect from the 1st October 1930 owing to acute depression in the rubber trade. The world wide economic depression has also had repercussions on Indian labourers employed on tea and rubber estates in Ceylon. Wages have had to be reduced but the Government of India have with the co-operation of the Colonial Government successfully prevented such reduction from materially affecting the labourers' standard of living in conjunction with the further reductions in wages the issue price of rice is being reduced from Rs 4 80 to Rs 4 per bushel. For those who are unwilling to work on reduced wages facilities for repatriation to their homes in India have been secured. The position in both the countries is being watched by the Government of India, through their Agents and it is hoped that the rates of wages originally agreed upon will be restored as soon as the present crisis has passed.

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an Officer for the purpose and to give him all facilities and in December, 1924 an Indian Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry.

Kunwar (now Sir) Maharaj Singh's report was published by the Government of India in August

1926. The various recommendations made in the report have been commended to the consideration of the Colonial Government.

In February, 1926 the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, viz that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the Island the Colonial Government expressed their willingness to give effect to several of them.

The present position of Indians in the Dominions is that under the Canadian Dominion Election Act Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In New Zealand Indians enjoy the franchise on the same footing as all other British subjects. In Australia, sub-section (5) of section 39 of the Commonwealth Electoral Act, 1918-24, was amended in 1925, by adding after the word 'Asia' the words 'except British India'. This measure gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr. Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It is therefore, in Western Australia alone that Indians do not enjoy the suffrage in respect of election for the Lower House by Acts which have recently been passed by the Commonwealth Parliament. British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 65 years of age or above 60 years, provided such persons are of good character and have resided continuously for at least 20 years. An Invalid Pension is obtainable by persons who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant of the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government.

Indians in Great Britain.

Some seventy years have gone by since the Parsee community, in the persons of the late Dattabhai Naoroji and other members of the firm of Cama & Co. led the way to the sojourn of Indians in England for business purposes. This led it has since maintained though there are both Hindu and Mohammedan business men firmly established there. Nor are the professions unrepresented for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 four Indians—the late Mr. Ameer Ali, the first Lord Sinha, the late Sir Binode Bihari and Sir Dinsha Mulla—have served on the Judicial Committee of the Privy Council. Three Indians are on the Secretary of State's Council. In 1919 the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government. In the spring of 1923 Mr. (now Sir) Dadabhai Dalal was appointed High Commissioner for India being the first Indian to hold the office. He resigned towards the end of 1924 to be succeeded by Sir Atul Chatterjee, who in 1921 was followed by Sir B. N. Mitter. The early years of the present century saw the gathering of a new Indian element in permanent residence—that of retired officials and business men or people of independent means who from preference or in order to have their children educated in England, leave the land of their birth and seldom if ever visit it again. Further the stream of Indian summer visitors includes wealthy people who come regularly.

Sectionally the only Indian community to be fully organised is that of the Parsees. They have an incorporated and well-endowed Parsi Association of Europe. Its central Zoroastrian House, 11 Russell Road, West Kensington opened in 1929, includes a room devoted to ritual and ceremonial purposes, a reading room and library and rooms for social intercourse. The Arva Bhavan, a home for orthodox Hindus visiting London, was opened at 30 Deloche Park, Hampstead in the summer of 1923. Indian business interests have been organised by the formation of the Indian Chamber of Commerce in Great Britain, with offices at 80 Gracechurch Street, E.C. 3. The East India Association (8 Victoria Street, S.W. 1) established in 1857 provides a non-partisan platform for the discussion of Indian problems and exists to promote the welfare of the inhabitants of India. The India League (148 Strand, W.C.) under the chairmanship of Mr. Bertrand Russell exists to support the claim of India for Swaraj (Self Rule). At the other end of the scale in Indian political controversy is the Indian Empire Society, 128, Alfred Place, South Kensington, S.W. 7, with Lord Sumner as President and Field Marshal Sir Claude Jacob as Chairman of the Executive Committee.

India House.

In March, 1930, the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to

the new India House in Aldwych, erected and furnished at a cost of £234,000. The design of this noble building which has a frontage of about 130 ft. opposite the Waldorf Hotel, was the work of Sir Herbert Baker, A.R.A., with Dr. Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior, the architect has given to the details of the external elevation, by means of carving, heraldry and symbolism an individuality that proclaims it the London home of India. Including basement and mezzanine floors, there are twelve floors in all, the available space for clerical work alone being between 50,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery, and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase exhibition hall, octagonal hall and library markedly express the Indian character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone, carved and pierced in the geometrical patterns of the fret in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Maharastra. The use throughout of Indian hardwoods, chiefly gurgan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non-Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver grey koko laurel and the beautiful dark red padouk have been used. The domes and vaults of the building have been embellished by mural paintings the work of specially selected Indian artists. The water supply is entirely independent of municipal service, being obtained from two artesian wells sunk some 460 ft. below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House, with all other departments of the Office of the High Commissioner excepting the Stores Department which is at the depot off the Thames at Belvedere Road, Lambeth.

The Students.

Under normal conditions it is the student community which constitutes the greatly overpowering Indian element and creates a constant problem. Its numbers multiplied ten or twelve fold in the quarter of a century before the war. After a very considerable temporary

check caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduates or under graduate student, there are some youths of good family, including heirs of Indian States, admitted into our public schools, such as Eton and Harrow. There are some 500 Indians at the Inns of Court. Since the war there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there are fully 2,000 young Indians (some five per cent of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbs about half the total.

The Advisers.

It is well known that for many years ago Indian students were left to their own devices apart from inadequately supported unofficial efforts and the chance of coming under the influence of English friends of their families. But in April 1909 Lord Morley created for their benefit a Bureau of Information and appointed the late Sir Thomas Arnold to the charge of it under the title of Educational Adviser. The Bureau was located at 21, Cromwell Road together with the National Indian Association and the Northbrook Society, which were thus given spacious quarters for their social work among the young men. In India the provincial advisory committees to help and advise intending students have been replaced in some instances by University Committees. The work of the Bureau rapidly expanded and in consequence Lord Crew in 1915 re-organised the arrangement under the general charge of a Secretary for Indian students, Mr. (now Sir) O. E. Mallet who resigned at the close of 1918. He was succeeded by Dr. Arnold under the designation of Educational Adviser for Indian Students to the Secretary of State. Mr. N. C. Sen followed Sir T. Arnold as Local Adviser in London. At Oxford the Oriental Delegacy and at Cambridge the Inter-Collegiate Committee have been instituted to deal with Oriental students generally, whilst Local Advisers for Indian students have been appointed at Manchester, Edinburgh and Glasgow.

These arrangements underwent far-reaching revision in the autumn of 1920 in connection with the setting up, under the Act of the previous year of a High Commissioner for India in the United Kingdom. The "agency work" Sir William Meyer took over from the Secretary of State included that connected with Indian students. Sir Thomas Arnold accepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr. N. C. Sen and Dr. Thomas Quayle as Joint Secretaries for the Education Department. The administrative work hitherto divided between the India Office and 21, Cromwell Road was consolidated at the offices of the High Commissioner, thereby creating a good deal of duplication of files and papers. Dr. Quayle is now Secretary in the Education Department of the Office of the High Commissioner and is assisted by Messrs. P. K. Dutta,

B. M. J. Knaster and V. I. Gaster with Miss C. H. Bose to look after women students.

The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrangements had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar. The Committee held that it should be possible to secure admission both to British universities and subject to certain reservations to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamberlain recommended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the Inns of Court. An Act for the purpose was passed by the Indian Legislature in 1926 but has not narrowed the stream of students at the Inns of Court.

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly Sir Atul Chatterjee held a conference in July 1925 when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London. The subject had been previously discussed at a meeting of the East India Association (April 27, 1923) when a paper was read by Mr. F. H. Brown. The conference came to the conclusion that, since non-official effort admittedly does not meet the need fully the hostel and club at 21, Cromwell Road, should be maintained, more particularly to provide accommodation for new comers. A small committee with Mr. A. D. Bonarjee (Warden of 21, Cromwell Road) as Secretary was established to assist students in obtaining suitable accommodation. The increasing number of students coming from India has raised the question whether the time has not come for provision to be made for them on lines similar to those adopted by the Education Department of the Office of the High Commissioner. The Mysore State opened in 1923 an agency office at Grand Buildings, Trafalgar Square, and appointed a permanent Trade Commissioner.

Under the presidency of Lord Hawke an Indian Gymkhana Club in 1921 acquired

its own sports ground at Osterley, the total cost of purchase and equipment being estimated at £15,000. Generous gifts were made by Mr. H. B. King, others, particularly the Maharaja of Patiala, but further help is required. The cricket eleven of the Club has an excellent record in matches at Lords and the Oval and with suburban clubs.

A notable development of 1920 was the opening of the "Red Triangle" Shakespeare Hut in Bloomsbury, off Gower Street, as a union and hostel for Indian and Ceylonese students up to the number of 500. The hostel was removed to permanent premises 106-112, Gower Street, close to University College in the autumn of 1928. It is Indian both in conception and control, the warden and committee being responsible not to the National Council of Y. M. C. A. in London

but to the Indian National Council in Calcutta. While the organization has a definitely moral and spiritual as well as a social purpose, it is not a proselytizing agency. There is a steady average of some 550 members, and the hostel is exceptionally fortunate in securing the voluntary services of men and women of great distinction in many fields for the regular Sunday afternoon and other lectures. The Indian Students Central Association had a Club house and restaurant at 2 Beaufort Gardens, S. W. 3 but has ceased to exist, a fate which overtakes many short-lived organisations in relation to India.

There has been some recent development in the matter of periodical literature devoted to India. The weekly *Star East and India* is well known, the fortnightly *Indian Review* is the organ of the India League and the monthly *Indian Empire Review* that of the Indian Empire Society.

SOCIETIES AND INSTITUTIONS IN LONDON CONNECTED WITH INDIA.

BRITISH INDIAN UNION—Promotes friendship and understanding between the two races. 52 High Holborn W. C. 1. *Hon. Secretary* R. S. Mehra.

CENTRAL ASIAN SOCIETY.—77 Grosvenor Street, W. 1. *Hon. Secretary* Brigadier-General Sir Percy Sykes, K.C.I.B. O.S. C.M.S. and K.M. Gull. *Secretary* Miss N. M. Kennedy.

EAST INDIA ASSOCIATION—Its object is to promote by all legitimate means the welfare of the inhabitants of India generally. The objects and policy of the Association are promoted—(1) by providing opportunities for the free public discussion, in a loyal and temperate spirit of important questions affecting India, (2) by promoting friendly social contact between Indians and English men interested in India, (3) by lectures and the publication of papers or leaflets correcting erroneous or misleading statements about India and its administration, and (4) generally by the promulgation of sound and trustworthy information regarding the many weighty problems which confront the Administrations in India so that the public may be able to obtain in a cheap and popular form a correct knowledge of Indian affairs. *President* Lord Lamington. *Hon. Secretary* F. H. Brown. C.I.E. 3 Victoria Street, S.W. 1.

INDIA SOCIETY—The study of the arts and letters of India. 3, Victoria Street, S.W. 1. *President* the Marquis of Zetland. V.C. *Hon. Secretary* F. J. P. Hunter, M.A.

INDIAN STUDENTS UNION AND HOSTEL.—112, Gower Street, W. 1. *Chairman* Sir Ewart Greaves. *Warden* A. S. Inman.

INDIA LEAGUE—(Formerly Commonwealth of India League) to support the claim of India for Swaraj (Self Rule). 146, Strand W. C. 2. *Chairman* Bertrand Russell.

INDIAN EMPIRE SOCIETY—(Opposed to the Government scheme of All-India Federation but would favour proposals of the Simon Commission, other than the transfer of Law and Order in the provinces). 29 Alfred Place, South Kensington, S.W. 7. *Secretary* Sir Louis Stuart. C.I.E.

INDIAN ORIENTATION GROUP—(Meeting at Friends House, Rushton Road, N.W. 1). *Chairman* Cecil Heath.

INDIAN VILLAGE WELFARE ASSOCIATION.—4 Great Smith Street, S.W. 1. (To collect information on and obtain financial support for rural reconstruction). *Hon. Secretary* Miss A. E. Cator.

INDO-BRITISH MUTUAL WELFARE LEAGUE.—*Joint Hon. Secretaries* Mrs. Hannah Sen and Mrs. O. Hogler (53, Maworthy Road, N.W. 3).

INDIAN GYNEKHA NA CLUB.—Thornton Avenue, Osterley. To promote the physical well being of Indian students. *Secretary* Captain W. E. B. Berry, 10, King's Bench Walk Temple, E.C. 4.

NATIONAL INDIAN ASSOCIATION—Chief aims to promote the welfare of students. 21, Cromwell Road, S.W. 7. *Secretary* Miss E. J. Beck.

NORTHERN SOCIETY—Makes grants to deserving Indian students. 21, Cromwell Road, S.W. 7. *Hon. Secretary* E. Oliver.

ROYAL ASIATIC SOCIETY—Research in the history and antiquities of Asia. 74, Grosvenor Street, W. 1. *Secretary* Col. D. M. F. Hoysted, C.B.E., D.S.O.

ROYAL EMPIRE SOCIETY—Formerly Royal Colonial Institute. Northumberland Avenue, W. C. 2. *Secretary* George Fletcher.

ROYAL SOCIETY OF ARTS has an Indian section before which lectures are delivered on industrial, historical and commercial questions. 18, John Street, Adelphi, W. C. 2. *Secretary* G. K. Menzies. C.M.G., M.A. *Secretary, Indian Section* W. Perry.

ROYAL INSTITUTE OF INTERNATIONAL AFFAIRS, Chatham House, 10 St. James's Square, S.W. 1. *Secretary* Ivon S. Macdonald. C.B.E.

PARSIS ASSOCIATION OF EUROPE—London. Zoroastrian House, 11, Russell Road, Olympia, W. 14.

STUDENT CHRISTIAN MOVEMENT OF GREAT BRITAIN AND IRELAND.—*Secretary* R. C. Mackie, Abchurch Lane, North End Road, Golders Green, N.W. 11.

VICTORIA LEAGUE.—21, Cromwell Road, S.W. 7. *Secretary* Miss Gertrude Drayton, C.B.E.

Sports

With the political situation improving sport practically came back into its own and all over the country there was a revival of activities which had been suspended. India during 1932 was considerably interested in sport overseas. There was the Olympic Games, at Los Angeles where India retained her honours won on the hockey field in Amsterdam but her athletes failed to register a victory in any event, which was not unexpected as it is realised that athletics in India are still in their infancy in fact there is not a single cinder track in the country. Despite the handicaps which athletes labour under, they acquitted themselves fairly well in competition against the rest of the world.

In England the India Cricket team earned high praise for their sportsmanship, fine cricketing qualities and their splendid performance in the first Test match ever played by India at Lords. So well did her cricketers perform that India won a place in Test cricket and when the M. C. C. tours this country during the cold weather of 1933-34 three Test Matches will be played. A great deal of the credit for India's advance on the cricket field is due to the Indian Board of Control for Cricket in India and especially to Messrs R. B. Grant-Jovan and A. S. de Mello President and Honorary Secretary respectively, on whose shoulders the brunt of the work has fallen. Unfortunately the big Bombay Quadrangular could not be revived this winter still persisting in their attitude of non-co-operation as far as cricket was concerned. In other parts of India however the game was played as usual and additional interest was created by the series of trial matches which were played in several parts of the country with a view to selecting the team to tour England.

As far as Tennis is concerned the chief events were the visits of two international teams. In the early part of the year the Japanese team played a series of games in various stations and a match against an Indian team which the visitors won. Then later on in the year an Italian team including the ambidextrous player De Stefani, toured India and there is no doubt that these two visits gave the game a big uplift all over the country. They have been of great educational value to Indian players and continued contact with foreign stars is bound to improve the standard of the play of the best players in India. These visits were arranged by the South Club of Calcutta but in future the Indian Lawn Tennis Association will make the arrangements for future tours.

Hockey, of course maintained its great popularity and the victorious Olympic team were given a great reception on their return to their native land. They played a series of exhibition games in several stations which attracted huge crowds. The Bombay Aga Khan Cup and the Beighton Cup in Calcutta continued to be the two premier tournaments and the Customs teams of Bombay and Calcutta stood out as the best club sides. The Indian Hockey Federation affairs did not run too smoothly for a while but things were eventually straightened out to everyone's satisfaction. Mr. Rayman continues as President.

Association Football plays a large part in the sporting world of India, the many military teams in the country being chiefly responsible for this. In Bengal the Indian has taken to the sport in wonderful fashion and one or two teams can hold their own against the pick of the military sides. The chief tournaments are the Indian Football Association Shield played in Calcutta, the Rovers Cup played in Bombay and the Durand Cup played in Simla. In Bengal the game is governed by the Indian Football Association in Western India by the Western India Football Association while attempts are being made to form associations in other parts of India.

The handling code, Rugby football, is confined to Europeans and is played during the Monsoon and the usual tournaments were again well supported in 1932. The All India Cup which this year was played at Madras was won by Ceylon. Other tournaments were played at Bombay and Calcutta in the short season which this game has.

Golf is played everywhere though in Bombay the Royal Bombay Golf Club course is more or less an improvised one but there are some sporting courses in the country and big competitions are played at Nasik and Calcutta.

Boxing continues to boom especially amateur boxing. There were few professional contests during the year and the prominent paid men had difficulty in arranging bouts owing to lack of opponents. The Army supplies the majority of the boxers in India though in Western India and Bombay in particular there are a number of fine civilian fighters. The Bombay Presidency Amateur Championships take several days to get through while the Army and Air Force Individual Championships, which were held at Bombay lasted a week. There is great interest taken in the sport and there are a number of Indians who are really good boxers. They are taking to boxing with great keenness.

The developments of Athletics is handicapped through absence of proper tracks and training grounds. Though a team of athletes was sent to the Olympic Games they went with little preparation. Few sports meetings are held and there is a dearth of expert coaches in the country. The Olympic Council is working hard to improve matters but they have a difficult task before them.

Yachting flourishes in Bombay, Poona, Kaimi Tal and Calcutta. Interest in Rowing is growing and Calcutta, Bombay, Poona, Madras and Kaimi Tal all have boat clubs.

The Turf.—No matter what the state of the country is politically or commercially racing continues and the big Turf Clubs held their own though probably their revenue dropped a little. Attendances were large at all the popular arenas and the interest in the big races was as great as ever. Increased encouragement continues to be given to India bred horses.

A summary of the chief sporting events of the year appears in the following pages.

Racing.

Bangalore.

R C 1 (Cup Distance about 1 mile 3 furlongs—

Mr J Yorke & Bridgefly (8st 11lb), North more

Mr J C Galstaun & Kandala (8st) Mendooza

Mr T H Laird & Second Shot (8st 11lbs), Kylands

Mr Pine & Sansavis (8st 10lbs) White side

Won by a short head $\frac{3}{4}$ lengths 1 length Time—2 min 29 $\frac{2}{5}$ secs

H H The Yavara of Mysore & Cup Distance about 1 mile 3 furlongs—

Mr Rambhoy Kashibhoy & Mushoor (8st 10lbs) Thompson

H H the Dowager Maharam of Kolhapur & Farrag (7st 8lbs) Evans

Mr Amin Mulla Fathai & Anan (8st) B McQuade

Haji Rajmshomed Vazir & Mubairan (7st 11lbs) Whiteside

Won by $\frac{1}{2}$ length $\frac{3}{4}$ length $1\frac{1}{4}$ lengths Time—2 min 41 $\frac{2}{5}$ secs

Krishnah Chetty Cup Distance about 1 mile furlongs—

Mr Beramji Rustomji & Gunboat Jack (8st 11lbs) Whiteside

Messrs Saleh Moosa and Ranglla & Har dinge (7st 7 lbs cd 7st 9lbs) Clarke

Mr Rambhoy Kashibhoy & Chabookchi (8st 4 lbs) Thompson

Mr S H Mahomed & Dhiyanoor (8st 10lbs) Marable

Won by a head $\frac{3}{4}$ lengths $1\frac{1}{4}$ lengths Time—2 min 42 $\frac{3}{5}$ secs

Bangalore Cup Distance about 1 mile 3 furlongs—A handicap for horses in Class III—

Mr Oscott & Private Seal (8st 13lbs) Peck

Mrs M Clarke & Recall (8st 7lbs) Whiteside

Mr J C Galstaun & Harmonique (8st 4lbs) Selby

Mrs H M Thaddeus & Vektub (7st 6lbs), McCarthy

Won by 5 lengths 6 lengths, 4 lengths Time—2 min 25 secs

Madras Cup Distance 7 furlongs—

Haji Sir Ismail Saif & Flip the Frog (9st 4lbs), Howell

Mr C E Cutting's Splendid II (8st) Marable

His Highness the Maharaja of Mysore & Budra (8st 10lbs), Hill

Earl of Shannon & Summer (8st 2lbs) McCarthy

Won by a neck, half length head. Time—1 min 30 secs

Barton Cup Distance 7 furlongs—

Mr G L Lyons Crinoline (7st 6lbs), Evans

Mr Asaye & Little Froube (8st 2lbs) H Black

Mr P C Barua & Solby (8st 11lbs), Mendooza

Messrs Newman Saunders and Gregory & Flitzer (8st 2lbs) F Black

Won by neck short head neck Time—1 min 31 $\frac{4}{5}$ secs

Apollo Cup Distance about 1 mile, 3 fur longs—

Mr S H Mahomed & Dhiyanoor (7st 11lbs), Marable

Mr A Lookmanji & Mlayar (8st 8lbs) Cooper

Area of State 498 Square miles

Population 92,636

Capital Town Akalkot
(Sholapur District)

The State for the purposes of administration is divided into a Taluka—Akalkot—and two Pethas,—Piliv and Kurla. Owing to minority the State is at present administered by the Dowager Rani Saheb Tarabai as Regent with the help of a Government Adviser and exercises wide powers as Regent

Judicial An independent High Court Bench established in 1931

Educational Primary education free to backward and depressed classes and girls of all castes and creeds. Free secondary education to girls. Scholarships and freeships for secondary and higher education

Local Self Government Municipality at Akalkot and Taluka District Local Board

General A New Water Works Scheme costing 8 lakhs, a new Girls' School costing Rs 30,000 and many other improvements are in hand. State's Reserve Balance Rs 17,52,090 earmarked for programmes of public works and needs of the Raje Saheb's family

Government Adviser MR A N PRADHAN, B A. He is also the High Court Judge

Dewan MR V B PARULEKAR, B A. He is also the District and Sessions Judge

Chief Police Officer RAO BAHADUR S R JAGDALE

SIRDAR NAWAB NAHARSINGJI ISHWARSINGJI
M. L. A 1st Class Sirdar
of Gujarat and Thakore
Saheb of Amod in the District
of Broach in the Presidency
of Bombay

Born 2nd April 1877

Ascended the gadi on the
9th May 1901

Married to the daughters
of the Thakore Sahebs of
Nepad Virpur and sister of
the Thakore Saheb of Kewada

Total annual revenue Rs
1,53,541

Area of holdings 18,985
acres

Member of Bombay Legislative Council for 9 years, first elected in 1909 as a representative of the Talukdars and Sardars of Gujarat Honorary 1st Class Magistrate for many years Elected President of the Broach District Local Board for considerable time

Recognized as a leader of the Muslim Community and was elected President of All-India Moslem Rajputs Conference held at Ambala in 1930, and at present standing President of that Body Also elected President of the Anjuman Himayate Islam 41st Anniversary, Lahore, in 1927 which attracted a gathering of more than a lac of people

In the order of precedence has the privilege of being the head of the Molesalam Garasias in Gujarat Head among the Thakores in the district of Broach Second among the Sirdars and Talukdars of Gujarat

Takes lively interest in the spread of education and Islamic philosophy

Has always stood for Hindu-Muslim Unity and sound liberal politics and social reform

The distinguished title of "Nawab" was conferred in 1929 by His Majesty the King-Emperor in appreciation of various public services His steadfast loyalty to the Throne and deep reverence for His Majesty the King-Emperor, and Empress Mary are well known

SHRIMANT BHAVANRAO SHRINIWASRAO *alias* BALASAHEB PANT PRATINIDHI, the Ruler of Aundh, is a graduate of the Bombay University and a treaty Chief. His age is 64 and is married to Shrimati Saubhagyawati Ramabai Saheb *alias* Maisaheb from the Rode family of Poona.

Her-Apparent SHRIMANT BHAGWANTRAO *alias* BAPUSAHEB is 13 years of age.

Shrimant Pantaheb is alive to the rapid progress going on in the civilized world. A Legislative Assembly was established in the State in 1924. Its strength consists of 39 members with a predominating popular element. The notable feature of the Assembly is that it includes two female members. The Assembly is competent to discuss any subject and pass resolutions without restrictions, while the Annual Budget is passed item by item.

By the Aundh State Act passed in 1931 a Darbar has been formed to run on the administration. It is a miniature executive council and consists of the Dewan of Aundh and the High Court Judge. An elected representative of the people is to be a member of the Darbar after 1935.

The Pantaheb is a keen student of drawing and painting and has edited *Picture Verul*, *Pictorial Ajanta*, *Pictorial Ramayana* and *life of Shivaji* in three picture volumes. He also takes great interest in physical exercise and has written in English a book on the subject called "The Surya Namaskaras".

The State possesses an independent High Court.

Political Relations —With the Government of India, through
Agent to the Governor-General, Gujarat States, Baroda.

His Highness has prescribed a schedule of subjects in which
His Highness has got plenary powers of disposal for joint delibera-
tions with the Dewan and the Private Secretary. Thus a
miniature Cabinet form of Government has been introduced as a
first step towards reform.

**HIS HIGHNESS THE HON
THE MAHARAJADHIRAJA
SIR KANESHWAR SINGH
BAHADUR, K.C.I.E. of
Darbhanga**

Born 28th November 1907

Ascended the Gadi on 14th July 1929 on the death of his father, Sir Rameshwar Singh Bahadur, G.C.I.E. K.B.E., D.Litt., etc and is the 19th successor to the Darbhanga Raj

Family history Darbhanga Raj is an ancient principality of long standing and is the premier Raj in Bihar to-day. It is more or less identical with Mithila. The Royal family belongs to the Shrotriya Brahmin family of the highest class and the Maharajadhiraja of Darbhanga is the accredited secular head of this community over which he exercises powers, especially in matters social and religious.

The public donations made so far by His Highness to various Universities, Temples and Colleges amount to 6½ lakhs. Generous concessions to his tenants have been made and their welfare receives the constant attention of the Maharajadhiraja.

His Highness the Maharajadhiraja takes a very keen interest in politics—selected as a delegate to the first and second sessions of the Indian Round Table Conference—has been nominated as a member of the Council of State and elected as the president of the Bihar United Party—President of the All-India Landholders' Association and the Bengal Landholders' Association—Life President of the Bihar Landholders' Association—General President of the Sri Bharat Dharma Mahamandal, the premier Association of the Orthodox Hindus in India—Life President of the Marthula Mahasabha—A life-fellow of the Patna University, a fellow of the Calcutta University and the Royal Society for the Encouragement of Arts etc—A member of the Royal Empire Society.

In recognition of his public services His Highness was made a K.C.I.E. by His Imperial Majesty The King Emperor of India in January 1933.

Chief Recreations Polo, Tennis and Motoring. His Polo team is considered to be the best in Bihar and has won several trophies.

His Highness possesses a rich library wherein there is a number of valuable old manuscripts.

Area of the State 2,500 square miles

MAJOR HIS HIGHNESS
MAHARAJA LOKEN-
DRA SIR GOVIND
SINGH JU DEO BAHADUR,
G.C.I.E., K.C.S.I., Ruler
of Datia

The State has a Legislative Council of twenty members eight of whom are elected and an Executive Council of six officials with a President. It maintains its own paper currency and coinage, postal system, railways and army. It has a University with six Arts Colleges including one for women and Colleges for Engineering, Medicine, Law and Teaching. It has also an Honours College affiliated to Madras University, a College for Jagirdars and a College of Physical Education. There are also a Central Cottage Industries Institute, a Central Technical Institute and an Observatory. The State is of great historical and archaeological interest, as within its limits are situated many old capitals of ancient and medieval Deccan Kingdoms, famous forts, temples, mosques and shrines and the wonderful Buddhist sculptures and paintings of Ellora and Ajanta.

Capital Hyderabad—Population 466,000. It is the fourth largest city in the Indian Empire. The city is beautifully situated on the banks of the river Musi, with fine public buildings, broad cemented roads, good electricity and water supply and an efficient bus service run by the State Railway. Among interesting places are the Char Minar, the Mecca Masjid, the fort and tombs of Golconda and the large artificial reservoirs—the Osman Sagar and the Himayat Sagar.

Born 1871. Was adopted in 1876 and was invested with powers in 1892.

Educated in the Rajaram High School, and College, Kolhapur, Elphinstone College and Government Law School, Bombay and attended the High Court for practical training in Law.

Married in 1886, Shrimant Sakal Saubhagyawati Gangabai Marseheb, daughter of late Mr Mohanrao Moreswar Paranjpe, landlord and pleader, Ahmednagar. Adopted Venkatrao Raosaheb in 1917, who died in 1924. Visited Java in 1913. Made three trips to Europe. Went to Burma in 1927 and to Ceylon in 1930. Is the author of an observant book called "Impressions of British Life and Character". Has also translated some English books into Marathi. Has established a fund called the Ichalkaranji Education Endowment Fund for encouragement of foreign education.

Area of the State 241 square miles of which $\frac{1}{3}$ consists of forest.

Population 68,573

Revenue Rs 5,25,158

Administration is conducted with the help of a Council of which Mr J. L. Goheen, of the American Presbyterian Mission, Sangli, is the head.

HIS HIGHNESS MAHARAJA SHREE SHREE HIMMAT SINGHJI OF IDAR
 —The Idar House was founded 200 years ago by two brothers of the Maharaja of Jodhpur. His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line, and the grandson of the well known soldier and statesman His Highness Maharaja Major General Sir Pratap Singhji Sahib of Jodhpur fame. Maharaja Himmat Singh succeeded to the Gadi on the sudden death of His Highness Maharaja Sir Dowlat Singh on the 14th April 1931.

Born On 2-9-1889

Marrd In the year 1908 to Shree Jawahar Kunwar Sahiba the eldest daughter of Raja of Khandela in the Jajpur State

His Highness received his education at the Mayo College, Ajmer where he remained for 5½ years, leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chief Colleges in India and was awarded his Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma, five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding, and represented the College against the Aitchison College for 3 years at tent pegging, and also at tennis. For several years, he was captain of one or other of the junior football or cricket elevens, and he was one of the best and keenest polo players in the college.

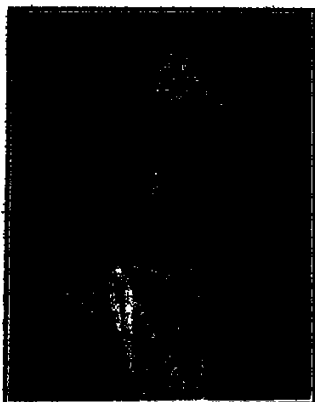

As will be seen he upheld his family tradition as a horseman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council, and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of His State when he ascended the Gadi of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. His Highness has embarked on an ambitious programme of reform and advancement which it is expected his experience and keen personal interest will enable him to carry through successfully.

His Highness has got two sons, Maharaja Kumar Daljit Singhji and Amar Singhji, the eldest Maharaja Kumar Shree Daljit Singhji, the heir apparent, was born in 1917.

JASDAN is the premier Kathi State and the Rulers are Saketiya Suryavanshi Khshtriyaas, being descendants of Katha, the younger son of the Suryavanshi Maharaja, Karan Shruta, of Ayodhya

The Kathis have, since their advent to this Province, effected a change in the name of the Province from Saurashtra to Kathiawad, and they are one of the most important and influential tribes on the westernmost coast of India

Darbar Shree Ala Khachar is the present Ruler of Jasdan. He was born on 4th November 1905. He is educated at the Rajkumar College, Rajkot, and has passed the Diploma examination

He succeeded to the Gadi in June, 1919, and assumed the reins of State administration on 1st December, 1924

Herr YUVRAJ SHREE SHIVRAJ aged three years

Area of the State 296 square miles including about 13 square miles of non-jurisdictional territory

Population 36,632 including non-jurisdictional territory

Revenue (gross) Rs six lacs nearly

All education is free throughout the State

Medical relief at the Hospital, etc, is also supplied free

Importation of liquor is prohibited.

Cultivators are granted permanent heritable tenure with rights of full ownership over their holdings and are protected against usury by special rules for settlement of money-lenders' claims

Village Panchayats introduced in twenty villages with a non-official president

Subordinate land-holders have recently been granted the unusual privilege of exemption from resorting to the Civil Court for adjudication of their *inter-se* disputes. These are now settled through the Arbitration Court presided over by the Nyayadhish

College, Benares, renowned for
his devout character and chari-
table disposition, a great en-
courager of education—Sanskrit
education in particular,—main-
tains a charitable dispensary
at Ranka and has recently

constructed the Govind High English School at Garhwa, named
after his illustrious father, and opened by Sir Hugh Stephenson,
late Governor of Bihar and Orissa, every important public
institution in the district is benefited by his munificence

The Raja Bahadur belongs to the famous Gor clan of Ajmer
Rajputs and ranks first among the leading Zamindars of Palamau
Throughout its history his family has been fervently loyal to the
British Government and rendered remarkable services during the
Indian Mutiny and on several other occasions First rate assistance
was rendered to the Government by the well-known Raja Shiva Prasad
Singh, one of the ancestors of Ranka family, in the conquest of and
the maintenance of order in Palaman, for which the whole of Pargana
Palamau was settled with him for some time In recognition of the
loyal services and public activities the title of Raja was conferred in
1922 and of Raja Bahadur in the year 1931 Raja Bahadur's eldest
son and heir-apparent, YUVARAJ GJINDRA NARAYAN SINGH, is being
educated at the Govind High School

It was at Ranka that H E Lord Minto a former Viceroy of India,
shot his first tiger in India in 1906, and since then it has been honoured
by the visits of the Governors of Bihar and Orissa on several occasions

THE Ruling Family in the Sant State belongs to the Parmar or Parmar caste of Rajput and is believed to have descended from the celebrated family of Vikramaditya and Raja Bhoj of Ujjain. (They first came down from Dhar and settled at Jhalod and finally about the 13th Century at Sant.) The founder of the family was Rana Sant who with his brother Laxdev was forced to leave Jhalod and established himself at Sant.

Area 394 square miles

Population 83,538 (1931)

Revenue Rs 5,29,428

The present Ruler Maharaja Shri Jorawarsinhji was born on 24th March 1881 and installed on the Gadil in 1896. He was formally invested with full powers on 20th May 1902. He was educated in the Rajkumar College, Rajkot, and was associated with the

Government Administration of the State for more than a year preparatory to his being invested with full powers. He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress. The revenue of the State increased—its lands have been surveyed and regular settlements introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund, granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to the local merchants by way of encouragement at cheap rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, metalled roads in parts have also been made. The regime of Maharaja Shri Jorawarsinhji has been anything but a bed of roses. Famines and lean years had made the financial condition of the State far from satisfactory, but wise management has been instrumental to keeping its head up.

The Rajaji exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadil and the Darbar's right of adoption has been recognised and confirmed by Government.

During the Great War the services of the Rajaji Sahib were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji to be a member of the Chamber of Princes.

Not apparent MAHARAJ KUMAR SHRI PRAVINENDRAJI was born on 1st December 1907

Educated in the Rajkumar College, Rajkot.

Married Maharaj Rajkumari, daughter of Maharaj Kumar Shri Vijayrajji, Hadrappant, Cutch State, on 13th May 1928, at Bhuj

SAPTASRI MAHARAJA
SIR BIR MITRODAYA
SING DEO, DHAR-
MANIDHI, JNANGUNAKAR,

Permanent Salute 9 guns

Secretary

AMARENDRA NATH SARKAR, B L

Legal Adviser

B C MAZUMDAR, ADVOCATE, CALCUTTA HIGH COURT

TAMKOTI RAJ in the Gorakhpur District (U P) dates its prominence long before the Mohomedan Rule in India though recognition of titles and Mansabs were obtained during the reigns of the Emperors of Delhi by Raja Kalyan Mal and Raja Hamir Sahu, and from the British Government in the time of Raja Kharag Bahadur Sahu

Raja Indrajit Pratap Bahadur Sahu, the present Raja Saheb of Tamkoti, at

the age of 5 years succeeded his father, Raja Shatrughn Pratap Bahadur Sahu after his death in the year 1898, since when many improvements have been made to the Estate in almost all directions—Political, Industrial, Social and Educational. The Raja Saheb has been a member of the Legislative Council since the time of the Reforms of 1920 though at present has discontinued his connection temporarily owing to some important Estate affairs requiring his personal attendance. He is still on the roll of many Government and Public Institutions and has contributed a lot to the well-being of his ryots and for the progress of the Estate during the short period he has had charge of the Raj. He is popular among all sections of the Public of Gorakhpur acting presently as the President of the District Board.

The Raja Saheb is closely related to His Highness the Maharaja of Benares in U P and of Bettiah and Tekari in the Bihar Province.

The Estate comprises of 462 villages in the districts of Gorakhpur and Basti in U P and Chhapra, Gaya, Muzafferpur and Darbhanga in Bihar Province.

Educated Privately

Heir HIS HIGHNESS MARTANDA VARMA ELAYA RAJA

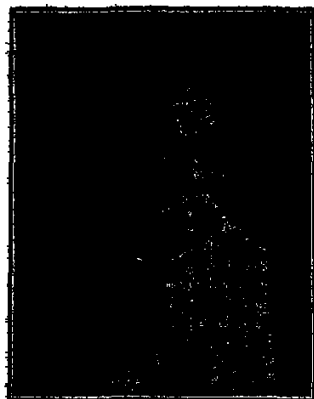

Travancore is one of the largest Indian States in South India under the Political control of the Government of India. It is bounded on the North by the State of Cochin and the District of Coimbatore, on the East by the Districts of Madura, Ramnad and Tinnevely and on the South and West by the Indian ocean and the Arabian sea. Travancore has an area of 7,625 square miles and according to the census of 1931, the population is 5,095,973. The State now stands in the forefront of educated India. According to the census of 1931, the number of literates per 1,000 of the population excluding children under 5 years of age is 289. For males the figures are 408 per 1,000, and for females 168. The Ruler of Travancore is the source of all authority, judicial, administrative and legislative. The government of the country is conducted in the name and under the control of His Highness the Maharaja.

The Dewan is His Highness' sole minister

The Calendars.

A full Calendar will be found at the beginning of this book. Below are given details of the other Calendars in use in India.

The Jewish Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 3,760 years and 2 months before the beginning of the Christian Era, the year is Luni-solar.

The Mohammedan, or era of the Hejira, dates from this day after Mahomet's flight from Mecca, which occurred on the night of July 15, 622 A.D. The months are Lunar.

The Persian year was derived from a combination of the Hejira and Samvat years by the order of Akbar. It is Luni-solar. The Samvat year seems also to have been related at one time to the Hejira, but the fact of its being Solar made it lose 11 days each year.

The Samvat era dates from 57 B.C., and is Luni-solar. The months are divided into two fortnights—*sukla*, or bright, and *badhi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendar.

Printing

*that is well-dressed in
appearance influences
your business*

Bad Printing is often thrown away unread, as cheapness in price is reflected in inferior workmanship and shoddy appearance. Indifferent Printing **CREATES A BAD IMPRESSION** in the minds of those who receive it. **YOUR BUSINESS NEEDS GOOD PRINTING.**

Any expenditure on your part to make it as attractive and persuasive as possible is an *investment*, and the expense involved in its production should be regarded as *essential to the profitable conduct of your business*. The Times of India Press produces printed matter of the highest quality at fair prices

Ask for our representative to call.
